19. Batteries	98
20. Installation, Test and Commissioning Tools.....	100
20.1. Detector Test Equipment.....	100
20.2. Loop Test Equipment	104
21. Product Type Index	105

Introduction

SecuriFire is a superbly adaptable life safety system, lending itself to small, medium and large building applications.

Virtually “no limits”

SecuriFire is a modular system uniquely designed to easily meet the needs of standalone installations or multi-node networked systems. A single node system supports up to 16 loop controllers with up to 250 devices per loop, depending on the loop protocol used (SecuriLine extended or standard). Up to 16 alarm panels can be networked in one sub-system. Up to 64 sub-systems can be networked to a virtually unlimited installation.

Fully Redundant - Totally Failsafe – 8 Zones Extinguishing

Consistency is the hallmark of any great organization or process. When it comes to fire detection systems, consistency is not a desired goal; it is a must. SecuriFire 3000 is the only 100% failsafe system on the market. It provides redundant processing exceeding the stringent EN54 requirements. Its full hardware redundancy and wiring flexibility are not found in any other system. The full hardware redundancy allows for eight (8) extinguishing zones per panel.

Small but power-packed: tailor-made fire detection of the highest standard

SecuriFire 1000/2000 provides a cost-optimised state-of-the-art system that is always up to the task, no matter how tough the conditions. The unique principle of software redundancy ensures that the fire alarm control panel is capable of raising the alarm at all times and under all conditions. SecuriFire 1000/2000 constantly self-tests its functionality, signalling any faults immediately.

SecuriFire 1000/2000 adapts perfectly to every building and every safety requirement.

SecuriFire 500 adapts perfectly to every building and every safety requirement.

SecuriFire 500 constantly self-tests its functionality, signalling any faults immediately.

The systems are ideally suited for small-sized premises such as hotels, restaurants, guest houses, shopping malls and leisure centres, retirement homes and all kinds of other facilities. The systems are compatible with existing and future generations of detectors. The solutions implemented as a result are utterly convincing, both economically and from a safety viewpoint.

Superb User Interface

The high resolution LCD colour graphics display talks your language and is designed to reduce operator interactions in critical situations and maximize design flexibility for custom systems. In addition to front panel control and annunciation, Securiton’s Universal Management System (UMS) provides desktop control and messaging in the familiar Windows environment. It gives the user access to all security installations - including fire detection, intrusion alarm, access control and CCTV – in one simple and intuitive interface.

SecuriFire Studio

A powerful System Definition Utility program helps define system operations in a fraction of the time required by previous methods. Virtually all SecuriFire operating features are software controlled. This gives SecuriFire unparalleled flexibility and ensures operational changes, expansions and upgrades will be possible with ease, even years after the initial setup.

Tested & Certified

All SecuriFire system modules are tested against EN standards and certified by VdS.

How to read the catalogue

Example of a typical entry for an item

Type & Article Number

Please quote this number when making an enquiry or ordering.

Module for monitored outputs 4300580-0002

B3-OM8

For connecting peripheral devices (flashing lights, sirens etc.); with eight 1.5 A controller outputs monitored for short circuits and wire breaks.

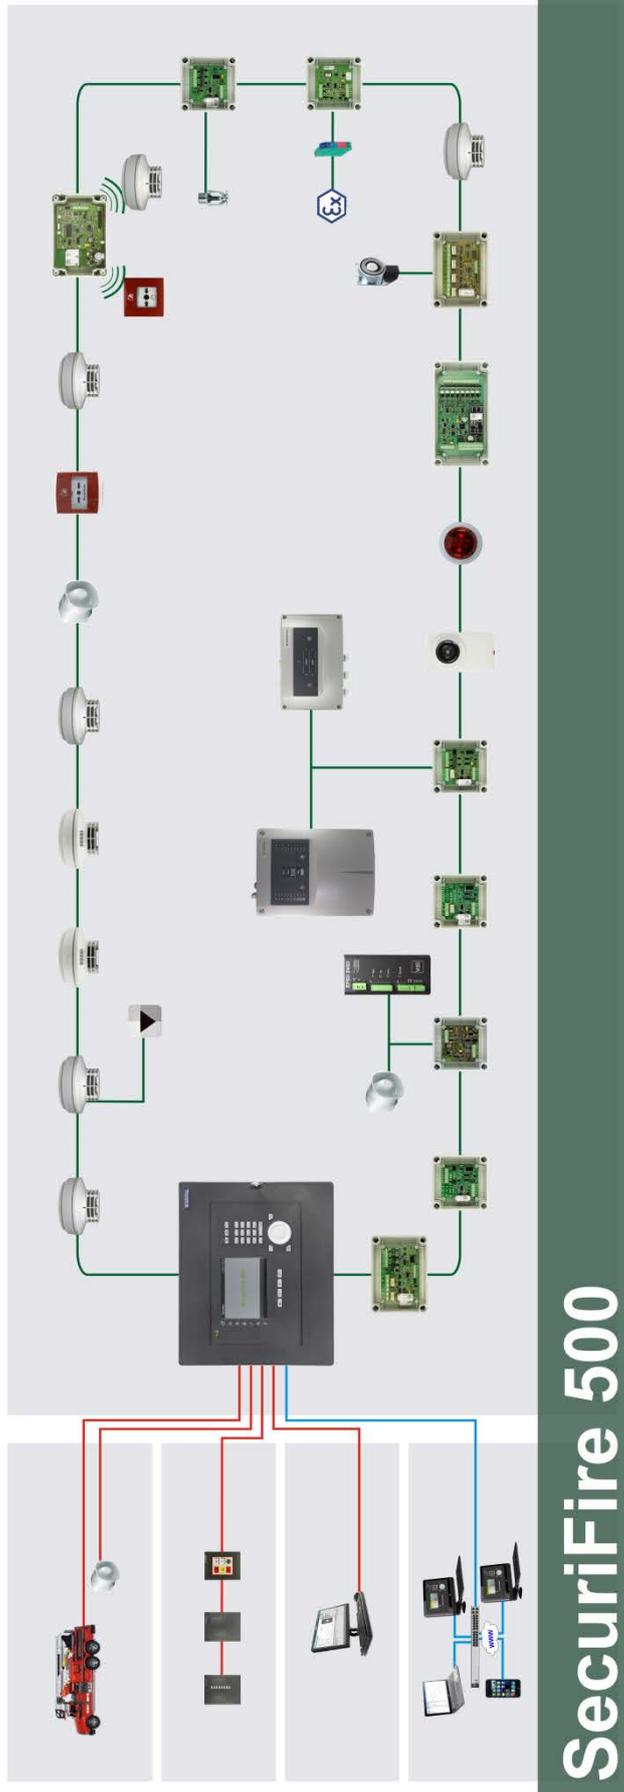

Technical data

Operating voltage	20 to 30 V DC
Current consumption	60 mA
Ambient temperature	-5 °C to +45 °C
Dimensions (H x W x D)	120 x 60 x 50 mm

1. Cabinets variants

1.1. SecuriFire 500 fire alarm control panel

SCP 500 Cabinet

B7-SCP520 SecuriFire 500 Basic Version, with built-in operating panel **20-1151000-01-02**

SecuriFire 500 basic version including:

- Polycarbonate cabinet (grey)
- B7-CPB11 Central Processor Unit
- Battery compartment (max. batt. size 2 x 12 V / 7 Ah)

Technical data

Mains voltage / Frequency:	110/230 VAC +15%/-20% 47-63 Hz
Power Consumption:	max. 75 W
Output voltage:	26,3 VDC (+50°C) to 28,3 VDC (0°C)
Output current:	2,5 A
Max. switching voltage:	240 VAC / 125 VDC
Max. switching current:	3 A
Max. switching capacity:	300 W / 2,500 VA
Batteries (largest):	2 pieces. 12 V / 7 Ah in series
Protection class (DIN 40050):	IP 30
Ambient temperature:	-5° to +50°C
Rel. air humidity:	5 to 95%, without condensation
Cabinet:	Polycarbonate
Dimensions(HxWxD):	300 x 340 x 80 mm
Weight of basic version:	2,3 kg (without batteries)
Case colour:	grey RAL 7016
VdS-Approval:	G 212112

1.2. SecuriFire 1000 fire alarm control panel

SCP 1000 Cabinet (key lock)

SCP 1020

B6-SCP1020 SecuriFire 1000 Basic Version, with built-in operating panel

20-1150007-01-02

SecuriFire 1000 basic version including:

- Sheet steel cabinet (grey)
- DOM-lock
- B6-BCB12 Central Processor Unit
- B6-PSU Power supply unit
- Power clips and battery cable
- Battery compartment (max. batt. size 2 x 12 V/17 Ah)

Technical data

Mains voltage / Frequency:	230 VAC +15%/-20% 47-63 Hz
Power Consumption:	max. 160 W
Output voltage:	26,3 VDC (+50°C) to 28,3 VDC (0°C)
Output current:	4 A
Max. switching voltage:	240 VAC / 125 VDC
Max. switching current:	3 A
Max. switching capacity:	300 W / 2,500 VA
Batteries (largest):	2 pieces. 12 V / 17 Ah in series
Protection class (DIN 40050):	IP 30
Ambient temperature:	-5° to +50°C
Rel. air humidity:	5 to 95%, without condensation
Cabinet:	Sheet steel
Dimensions(HxWxD):	400 x 445 x 150 mm
Weight of basic version:	8 kg (without batteries)
Case colour:	grey RAL 7035
VdS-Approval:	G 209049

1.3. SecuriFire 2000 fire alarm control panel

SCP 2000 Cabinet (key lock)

SCP 2010

SCP 2020

SCP 2030

B6-SCP2030	SecuriFire 2000 Basic Version, with built-in operating panel and printer	20-1150005-01-02
B6-SCP2040	SecuriFire 2000 Basic Version, with built-in operating panel, printer and cut out for EPI devices or Ext. Zone panel	20-1150006-01-02
B6-SCP2050	SecuriFire 2000 Basic Version, integrated MIC11 and cut out for EPI device	20-1150010-01-02

SecuriFire 2000 basic version including:

- Sheet steel cabinet (grey)
- DOM-lock
- B6-BCB13 Central Processor Unit
- B6-PSU Power supply unit
- Power clips and battery cable
- Battery compartment (max. batt. size 2 x 12 V/17 Ah)

Technical data

Mains voltage / Frequency:	230 VAC +15%/-20% 47-63 Hz
Power Consumption:	max. 160 W
Output voltage:	26,3 VDC (+50°C) to 28,3 VDC (0°C)
Output current:	4 A
Max. switching voltage:	240 VAC / 125 VDC
Max. switching current:	3 A
Max. switching capacity:	300 W / 2,500 VA
Batteries (largest):	2 pieces. 12 V / 17 Ah in series
Protection class (DIN 40050):	IP 30
Ambient temperature:	-5° to +50°C
Rel. air humidity:	5 to 95%, without condensation
Cabinet:	Sheet steel
Dimensions(HxWxD):	400 x 445 x 150 mm
Weight of basic version:	8 Kg(without batteries)
Case colour:	grey RAL 7035
VdS-Approval:	G 209047

1.4. SecuriFire 3000 fire alarm control panel

SCP 3000 Cabinet (key lock)

SCP 3020

Basic version including:

- Sheet steel cabinet (grey)
- DOM-lock
- B5-MCB15 Central Processor Unit
- B5-PSU power supply unit
- Module rack with BUS backplane
- Power clips and battery cable (B5 BATKAB1)
- Battery compartment
(max. batt. size 2 x 12 V/40 Ah)

SCP 3030

SCP 3040

SCP 3050

Technical data

Mains voltage	230 VAC(47-63 Hz)
Power Consumption	max. 280 W
Output voltage:	26,3 VDC (min. At +50°C)
Output current:	7,5 A
Max. switching voltage:	230 VAC / 125 VDC
Max. switching current:	3 A, both pins on terminals
Max. switching capacity:	300 W /2,500 VA
Batteries (largest):	2 x 12 V / 38...40 Ah
Protection class (DIN 40050):	IP 30
Ambient temperature:	-5° to +50°C
Rel. air humidity:	5 to 95%, without condensation
Cabinet:	Sheet steel
Dimensions (HxWxD):	670 x 470 x 230 mm
Weight of basic version:	23.5 kg (without batteries)
Case colour:	grey RAL 7035
VdS-Approval:	G 209045

SecuriFire Control Panel Accessories and Spare Parts

Panel Accessories:

Description	Type	Art. Nr.
Battery Extension Box (key lock), max 2 x 12V/45 Ah, size like SecuriFire 3000	B5-ADB 11	10-2000001-01-02
Battery Extension Box, max 2 x 12V/17 Ah, size like SecuriFire 2000	B6-ADB 10	10-2000002-01-01
Battery current measure cable	B3 KAB PSU5	FG81720
Cable for MMI-BUS with connector (between BAF/PSU and MMI-BUS part.)	B5-ST5-MMI-SUB	20-1060040-01-01
Cable for MMI-BUS with connector (between two MMI-BUS part.)	B5-ST5-MMI	20-1060041-01-01
Mains connection terminals for PSU	B5-ST5-KL	20-1060045-01-01
Blind plate for covering free slots	B5 BFP	FG06240-9
Color cassette for printer	PD FRB	HG694076
Connection unit for SecuriFire Network module	B5-AE Cat7-RJ45	30-6800004-01-02
Connector for SecuriFire Network module	B6-AS Cat7-RJ45	30-6800007-01-01
Distance frame for additional 20mm space	DFC21-1	12-4400039-01-01
Endless paper for printer	PD PPR	PPF-519057
Mounting rail for connection unit	B5-HS 35/216	30-6800005-01-01
Patch cable for network module	Cat5-Kabel 0,5 m	30-6800006-01-01
Patch cable for network module	Cat5-Kabel 3 m	30-6800006-02-01
Printer cover for SecuriFire Printer	B5-PDR-CO	20-1400202-01-01
Covering Strip (2 pcs.)	COS701-1	12-4400051-01-01
SD-CARD for B5/B6	SD-CARD for B5/B6	FG020325
1 key to DOM-cylinder	DOM-key	3910099

Spare Parts:

Description	Type	Art. Nr.
Basic control board for SCP520	B7-CPB11	20-1151100-01-02
Basic control board for SCP1000	B6-BCB12	20-1150001-01-01

Battery cable set long	B5 BATKAB2	FG29911
B3 Service pin	B3 SERVST	FG78801
Connector DAI2 / DXI2	ST-B3 16	YY970138
Connector DCI6	ST-DCI6	FG74099
Connector MTI8 / IM8, angulate (2 units, screwable on the side)	ST-MTI8	FG74087
Connector OM8	ST-OM8	FG74095
Connector BAF/OM	ST-BAF-OM	FG74088
Connector BAF-MMI/L	ST-BAF-MMI-L	FG74086
Connector PSU5	ST-PSU5	FG74090
Key for SCP520	DKM SCHL	FG020015--

Software Dongles and Licenses:

Description	Type	Art. Nr.
License SecuriFire including USB Dongle	D&L Studio	VE010956
License SecuriFire Studio 12 Months (extension)	LIC Studio	VE010962
SecuriFire Virtual MIC simulation on PC (unlimited license)	D&L MIC Sim	VE010957
Remote access Upgrade (unlimited license)	LIC RA	VE010958
Additional Language (check library for availability)	LIC MIC Lang	VE010959

Also available upon request:

Ethernet cable 3m or 5m for linking the Service PC-via MCB15

1.5. Demo and Test Equipment

SecuriFire 500 Democase

SF 500 DCU

VE010963

The SFD500 is a demonstration case for SecuriFire containing B7-SCP520, 1 MCD 573X, 1 CCD 573, RAL 720X and MCP 535X.

For sales demonstration

- Compact Dimension
- Incl. power cable (swiss standard)
- Incl. LAN cable to connect the SecuriFire Studio

Technical data

Power Consumption:	max. 75 W
Weight:	9.5 kg
Dimensions (HxWxD):	395 x 422 x 242 mm

2. Indication and Operating Panels

2.1. Built-in Indication and Operation Panels

B4 indicator panel for 1 exting. area without housing incl. cable

B4-EIP (without case, for mounting in a SCP 2040/2050)

FG81624A9

Single-zone extinguisher display
Internal LED control panel for one extinguishing area,

Characteristics:

- Display foil with 12 LEDs for extinguishing area
- Collective display with 9 LEDs
- Key switch for maintenance, extinguishing area in revision
- Labelling is by means of insertion strips

Built in Fire brigade panel CH (for Switzerland)

B5-EPI-FPC-E (without case, for mounting in a SCPxxxx)

20-1240001-01-01

Fire brigade panel providing an easy man-machine-interface for the fire brigade. Features a language independent application by means of pictograms. Connects via its EPI bus (cable included).

Technical data

Operating voltage:	22 to 30 V
Quiescent current:	1 mA
Ambient temperature:	-5° to +50°C
Dimensions (HxWxD):	85 x 70 x 20 mm

Built in Fire brigade panel NL (for Netherland)

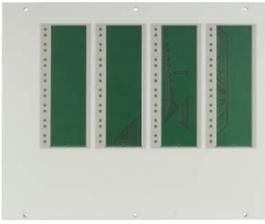

B5-EPI-ASP-E (without case, for mounting in a SCPxxxx)

20-1240110-01-02

Fire brigade panel providing an easy man-machine-interface for the fire brigade. Features a language independent application by means of pictograms. Connects via its EPI bus(cable included).

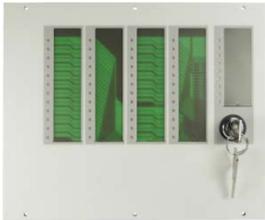

Technical data

Operating voltage:	22 to 30 V
Quiescent current:	1 mA
Ambient temperature:	-5° to +50°C
Dimensions (HxWxD):	85 x 70 x 20 mm

B3 Indicator Panel for 32 DZ w/o housing

B3-MMI-EAT32 BFE (w/o housing / for panel integration)

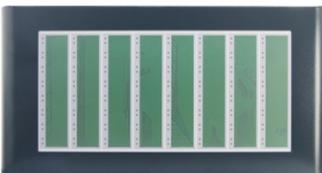

FG81622A9F

LED indicator panel for indication of alarm, fault and disablement states for 32 detector zones. The labelling uses push-in strips (not supplied) with the device also available without a case for fitting in switching cabinets.

B3 Indicator Panel for 4 exting. zones w/o housing

B3-MMI-IPES BFE (w/o housing / for panel integration)

FG81620A9F

LED indicator panel for indication of alarm, fault and disablement states for 4 extinguish zones. The labelling uses push-in strips (not supplied) with the device also available without a case for fitting in switching cabinets.

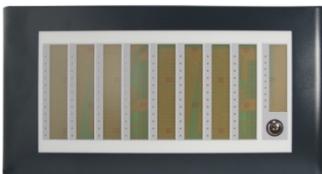

B3 External Indicator Panel for 64 DZ w/o housing

B3-MMI-EAT64 BFE (without housing)

FG81623-9F

LED indicator panel for indication of alarm, fault and disablement states for 64 detector zones. The labelling uses push-in strips (not supplied)

Technical data

Operating voltage:	10 to 30 V
Quiescent current:	2 mA per lit LED
Data transmission:	MMI-BUS
Electrical:	galvanically isolated RS 485
Protocol:	serial, DIN 19244-3
Distance to sub control unit:	max. 1200 m
Protection class:	IP 30
Ambient temperature:	0° to +50°C
Dimensions(HxWxD):	228 x 445 x 48 mm

B3 External Indicator Panel for 8 exting. zones w/o housing

B3-MMI-IPEL BFE (without housing)

FG81621-9F

External LED indicator panel for eight extinguishing zones (twelve LEDs per extinguishing zone and group indicator with nine LEDs), including case, key switch and controller module. The labelling uses push-in strips (not supplied)

Technical data

Operating voltage:	10 to 30 V
Quiescent current:	2 mA per lit LED
Data transmission:	MMI-BUS
Electrical:	galvanically isolated RS 485
Protocol:	serial, DIN 19244-3
Distance to sub control unit:	max. 1200 m
Protection class:	IP 30
Ambient temperature:	0° to +50°C
Dimensions (enclosure) (HxWxD):	228 x 445 x 48 mm

2.2. External Indication and Operation Panels

The SecuriFire standard indication and control maps provide well-organized, convenient, standards-compliant display and operation of a SecuriFire system and can be built into a FCP or separately mounted in their own housings.

External devices and indication and control maps can be connected to the "EPI-BUS" on each MIC. A maximum of 3 participants can be connected to this data bus at a distance of up to 1 m from the main indication and control map MIC.

Main Indication & Control Panel

B5-MIC711 (for RS485, SCP-network connection)

20-1230006-01-01

External main indication and control panel for SecuriFire 3000.

User-friendly full operation with "SecuriWheel" and system symbols.

Characteristics:

- In SecuriFire LAN integrable
- 5.7" TFT-Colour Display
- Customized menus (optional)
- Operation with scroll wheel or functional keys
- 4 different languages changeable online
- Up to 1200-m distance between MIC711 and central
- Redundant by double ring crosslinking
- Crosslinking with Ethernet protocol possibly (RX/TX)
- EPI-BUS- Interface
- Interface for external printer B5-MIC-PPE

Technical data

Operating voltage:	22 to 30 V
Quiescent current:	213 mA
Ambient temperature:	-5° to +50°C
Dimensions (HxWxD):	276 x 170 x 52 mm
Display:	5.7" TFT colour

Main Indication & Control Panel

B6-MIC711 (for RS485, non redundant)

20-1230003-01-02

External non redundant main indication and control panel for SecuriFire 2000.

User-friendly full operation with "SecuriWheel" and system symbols.

Characteristics:

- In SecuriFire LAN integrable
- 5.7" TFT-Colour Display
- Customized menus (optional)
- Operation with scroll wheel or functional keys
- 4 different languages changeable online
- Up to 1200-m distance between MIC711 and central
- Crosslinking with Ethernet protocol possibly (RX/TX)
- EPI-BUS- Interface
- Interface for external printer B5-MIC-PPE

Technical data

Operating voltage:	22 to 30 V
Quiescent current:	213 mA
Ambient temperature:	-5° to +50°C
Dimensions (HxWxD):	276 x 170 x 52 mm
Display:	5.7" TFT colour

Floor indication panel

B5-MMI-FIP

20-1230005-01-01

The SecuriFire floor indication panel provide well organized and convenient announcement of the conditions of the SecuriFire - system.

It contains a monochrome LCD display with 6 lines for the indication of all investment conditions in the clear text. No inscription on housing front (only announcement elements).

Characteristics:

- Connection to MMI-BUS
- Up to 1200m distance between FIP and central possible
- EPI-BUS-Interface

Technical data

Operating voltage:	22 to 30 V
Quiescent current:	213 mA
Ambient temperature:	-5° to +50°C
Dimensions(HxWxD):	276 x 170 x 52 mm
Display:	LCD display with 6 lines

Empty housing with blind cover

EHB 701-1

(EPI panel size)

12-4400038-01-01

The EHB 701 Empty Housing with Blind cover is for the SecuFire fire alarm control panel or the SecuriSafe intrusion control panel. It can be used as a distributor box, installation box, or for similar applications.

Technical data

Protection class:	IP 42
Dimensions(HxWxD):	137,5 x 170 x 45 mm

B3-MMI-UIO

EG072827

For controlling the floor plan and parallel display panels or as a remotely located input/output module for querying potential-free contacts (sprinkler systems), or also for controlling non-monitored horns, lamps, relays etc.

Technical data

Operating voltage:	10 to 30 V
Current consumption:	14 mA
Data transmission:	MMI-BUS
Electrical:	galvanically isolated RS 485
Protocol:	serial, DIN 19244-3
Distance to subcontrol unit:	max. 1200 m
Connection:	Floor plan panels, parallel indicator panels, flashing lights, sirens, horns, sprinkler systems, etc.
LED Outputs:	64 LED outputs 2 mA
LEDs per panel:	max. 256
Open Collector Outputs:	8 up to max.100 mA Output voltage max. +30 V
Matrix Configuration:	8 inputs with 8 outputs in an 8 x 8 matrix
Supply Voltage:	+5 VDC
Current Draw:	max. 3.3 mA
Ambient temperature:	-5° to +50°C
Dimensions(HxWxD):	160 x 105 x 20 mm
VdS-Approval:	G200116

Accessories:

Description	Type	Art. Nr.
Plastic Box	UIO-GEH	FG69041
Support plate	UIO STP	FG05203
Ribbon cable 34 pole with plug (1m)	UIO KAB 34	FG81725
Ribbon cable 40 pole with plug (1m)	UIO KAB 40	FG81726

B3 External Indicator Panel for 64 DZ

B3-MMI-EAT64-S
20-1230119-01-01

LED indicator panel for indication of alarm, fault and disablement states for 64 detector zones. The labelling uses push-in strips (not supplied). The device is also available without a case for fitting in switching cabinets.

Technical data

Operating voltage:	10 to 30 V
Quiescent current:	2 mA per lit LED
Data transmission:	MMI-BUS
Electrical:	galvanically isolated RS 485
Protocol:	serial, DIN 19244-3
Distance to subcontrol unit:	max. 1200 m
Protection class:	IP 30
Ambient temperature:	0° to +50°C
Dimensions (HxWxD):	228 x 445 x 48 mm
Case colour:	grey RAL 7016

B3 External Indicator Panel for 8 exting. zones

B3-MMI-IPEL-S
20-1230120-01-01

External LED indicator panel for eight extinguishing zones (twelve LEDs per extinguishing zone and group indicator with nine LEDs), including case, key switch and controller module. The labelling uses push-in strips (not supplied). The device is also available without a case for fitting in switching cabinets.

Technical data

Operating voltage:	10 to 30 V
Quiescent current:	2 mA per lit LED
Data transmission:	MMI-BUS
Electrical:	galvanically isolated RS 485
Protocol:	serial, DIN 19244-3
Distance to subcontrol unit:	max. 1200 m
Protection class:	IP 30
Ambient temperature:	0° to +50°C
Dimensions (enclosure) (HxWxD):	228 x 445 x 48 mm
Case colour:	grey RAL 7016

Intervention panel SV (for Sweden)

B5-MMI-IPS-S (cased version for external mounting) **20-1230114-01-01**

Intervention panel. Displays the relevant operating states to ensure simple operation by the fire brigade. Display message and labels are in Swedish language

Technical data

Operating voltage:	15 to 30 V
Quiescent current:	14 mA
Ambient temperature:	-5° to +50°C
Dimensions (HxWxD):	180 x 55 x 280 mm (HxWxD)

Fire brigade panel SV (for Sweden)

B5-MMI-FPS-S (cased version for external mounting) **20-1230117-01-01**

Fire brigade panel. Displays the relevant operating states to ensure simple operation by the fire brigade.

Technical data

Operating voltage:	15 to 30 V
Quiescent current:	14 mA
Ambient temperature:	-5° to +50°C
Dimensions (HxWxD):	276 x 170 x 52

Firebrigade panel CZ (for Czech Republic)

B5-MMI-FPCZ (cased version for external mounting) **20-1240201-01-01**

Intervention panel display and indicator panel. Displays the relevant operating states to ensure simple operation by the fire brigade.

Technical data

Operating voltage:	15 to 30 V
Quiescent current:	14 mA
Ambient temperature:	-5° to +50°C
Dimensions (HxWxD):	185 x 255 x 65 mm

Fire Brigade Panel NL (for Netherland)

B5-EPI-ASP-GS (cased version for external mounting) **20-1230110-01-01**

Fire brigade panel providing an easy man-machine-interface for the fire brigade. Features a language independent application by means of pictograms. Fits neat & nice beside a MIC711 and connects via its EPI bus (cable included).

Technical data

Operating voltage:	22 to 30 V
Quiescent current:	0 mA
Ambient temperature:	-5° to +50°C

Fire brigade panel CZ (for Czech Republic)

B5-EPI-FPCZ (cased version for external mounting)
20-1240121-01-01

DIN 14662 compliant fire brigade panel display and indicator panel. Displays the relevant operating states to ensure simple operation by the fire brigade. Provides an interface for extending the installation by a DIN14661 compliant fire brigade control panel. Display message and labels are in Czech language.

Technical data

Operating voltage:	22 to 30 V
Quiescent current:	21 mA
Data transmission:	EPI-BUS
Electrical:	galvanically isolated RS 485
Protocol:	serial, DIN 19244-3
Distance to subcontrol unit:	max. 1200 m
Protection class:	IP 30
Ambient temperature:	0° to +50°C
Dimensions (HxWxD):	185 x 255 x 65 mm
Case colour:	grey RAL 7032

Fire Brigade Panel SV (for Sweden)

B5-EPI-FPS-S (cased version for external mounting)
20-1230113-01-01

SS3654 compliant fire brigade panel display and indicator panel. Displays the relevant operating states to ensure simple operation by the fire brigade. Display message and labels are in Swedish language.

Technical data

Operating voltage:	15 to 30 V
Quiescent current:	14 mA
Ambient temperature:	-5° to +50°C
Dimensions(HxWxD):	276 x 170 x 52

Fire brigade panel CH (for Switzerland)

B5-EPI-FPC-GS (cased version for external mounting)
20-1230001-01-01

Fire brigade panel providing an easy man-machine-interface for the fire brigade. Features a language independent application by means of pictograms. Fits neat & nice beside a MIC711 and connects via its EPI bus (cable included).

Technical data

Operating voltage:	22 to 30 V
Quiescent current:	0 mA
Ambient temperature:	-5° to +50°C
Dimensions (HxWxD):	138 x 170 x 52

Partial Indication and Control Map

B5-EPI-PCM-GS (cased version for external mounting)

20-1230111-01-01

For switching and indicating functions in a SecuriFire system. Functions on buttons and LEDs can be configured via software.

- 16 LEDs (8 red and 8 yellow, pair wise)
- 8 push buttons

Technical data

Operating voltage:	22 to 30 V
Quiescent current:	0 mA
Ambient temperature:	-5° to +50°C

Partial Indication Map (2x16 LED red/yellow)

B5-EPI-PIM-GS (cased version for external mounting)

20-1230112-01-01

For status indication of detectors, zones or any other system parts. LEDs can be configured via software.

- 32 LEDs (16 red and 16 yellow, pair wise)

Technical data

Operating voltage:	22 to 30 V
Quiescent current:	0 mA
Ambient temperature:	-5° to +50°C

Indication & Contr. Panel (8 Buttons, 3x16 LED, red/ylw) in a SCP 500 housing

B7-PLB-PCM

20-1230116-01-01

SCP Cabinet with built in Partial indication and Control map (3 x16 LED red/yellow, 8 Buttons)

Characteristics:

- EPI-BUS- Interface

Technical data

Operating voltage:	22 to 30V
Quiescent current:	213 mA
Ambient temperature:	-5° to +50°C
Dimensions(HxWxD):	300 x 340 x 80 mm

Printer for MIC711

B5-MIC-PPE

20-1230002-01-01

Protocol printer for hard copy documentation of logged events. Comes in a MIC size housing and with the cable to connect it to the MIC711.

Technical data

Operating voltage:	10 to 30 V
Quiescent current:	0 mA
Power Consumption (print):	35 mA
Ambient temperature:	0° to +50°C
Dimensions (with case) (HxWxD):	170 x 138 x 62 mm

Spare parts

Description	Type	Art. Nr.
Colour cartridge for printer	PD FRB	HG694076
Paper roll for protocol printer	PD PPR	PPF-519057

2.3. 19" Equipment

19" Rack Version, incl. B5-PSU, B5-BUS, B5-MCB15, battery compartment

B5-ST5-BGT-SF

20-1060006-02-02

SecuriFire 3000 Rack for mounting in a 19" standing cabinet.

Inclusive:

- B5-PSU
- B5-BUS
- B5-MCB15
- Battery compartment B5-ST5-AF

External Indicator Panel for 64 DZ 19" (5 RU)

B5-ST5-MMI-EAT64-2

20-1060011-01-01

LED indicator panel 19" for indication of alarm, fault and disablement states for 64 detector zones. The labelling uses push-in strips (not supplied). The device is also available without a case for fitting in switching cabinets.

Technical data

Operating voltage:	10 to 30 V
Quiescent current:	2 mA per lit LED
Data transmission:	MMI-BUS
Electrical:	galvanically isolated RS 485
Protocol:	serial, DIN 19244-3
Distance to subcontrol unit:	max. 1200 m
Protection class:	IP 30
Ambient temperature:	0° to +50°C
Dimensions (HxWxD):	228 x 445 x 48 mm
Case colour:	grey RAL 7016

External Indicator Panel for 8 exting. zones 19" (5 RU)

B5-ST5-IPEL-2

20-1060012-01-01

External LED indicator panel 19" for eight extinguishing zones (twelve LEDs per extinguishing zone and group indicator with nine LEDs), including case, key switch and controller module. The labelling uses push-in strips (not supplied).

Technical data

Operating voltage:	10 to 30 V
Quiescent current:	2 mA per lit LED
Data transmission:	MMI-BUS
Electrical:	galvanically isolated RS 485
Protocol:	serial, DIN 19244-3
Distance to subcontrol unit:	max. 1200 m
Protection class:	IP 30
Ambient temperature:	0° to +50°C
Dimensions (enclosure) (HxWxD):	228 x 445 x 48 mm
Case colour:	grey RAL 7016

Front plate for MIC711 or 2 EPI devices

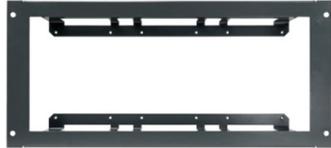

B5-ST5-MIC

20-1060004-01-02

Front plate for MIC711 or 2 EPI devices, for mounting in a 19" standing cabinet. (5 RU)

Front plate for MIC711 and EPI device

B5-ST5-MIC2

20-1060015-01-01

Mounting frame for 19" standard closet with cut out for one MIC711 and EPI device or 3 EPI devices. (5 RU)

Battery compartment for standing cabinet

B5-ST5-AF

20-1060007-01-01

Battery compartment to store batteries in a 19" standing cabinet.

Printer for 19"

B5-ST5-PR-2

20-1060001-01-01

Front plate for a protocol printer, for mounting in a 19" standing cabinet.

Blind plate small for 19" (1 RU)

B5-ST5-BFP2-2

20-1060008-01-01

Blind front plate small, for mounting in a 19" standing cabinet.

Blind plate for 19" (5 RU)

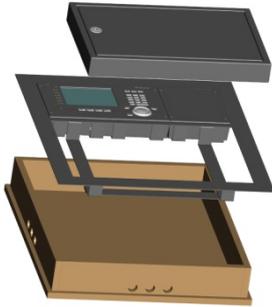

B5-ST5-BFP-2

20-1060003-01-01

Blind front plate, for mounting in a 19" standing cabinet.

2.4. Mounting Frames

Flush mounting kit for MIC711, EPI device and plan box

FME 70-1

12-4400004-01-01

Consists from flush mounting case with frame and attachment screw, to SecuriFire indication and control panels. Incl. plan box PLB 70-1
For 1 MIC and 1 small operating device and plan box.

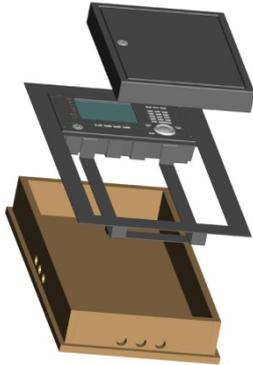

Technical data

Dimensions (H x D x W): 459x542x90 mm

Spare Parts:

Description	Type	Art. Nr.
Frame for flush mounting equip.	FFM 70-1	12-4400002-01-01
Flush Mounting Case	FMC 70-1	12-4400003-01-01
Plan box	PLB 70-1	12-4400001-01-01

Flush mounting kit for MIC711 and plan box

FME 71-1

12-4400013-01-01

Consists from flush mounting case with frame and attachment screw, to SecuriFire indication and control panels. Incl. plan box PLB 71-1.
For 1 MIC and 1 small operating device and plan box.

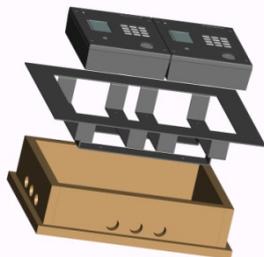

Technical data

Dimensions (H x D x W): 357x617x90 mm

Spare Parts:

Description	Type	Art. Nr.
Frame for flush mounting equip.	FFM 71-1	12-4400009-01-01
Flush Mounting Case	FMC 71-1	12-4400005-01-01
Plan box	PLB 71-1	12-4400017-01-01

Flush mounting kit for MIC711

FME 73-1

12-4400015-01-01

Consists from flush mounting case with frame and attachment screw, to SecuriFire / SecuriSafe indication and control panels.
For 1 MIC and 2 small operating device.

Technical data

Dimensions (H x D x W): 357x251x90 mm

Spare Parts:

Description	Type	Art. Nr.
Frame for flush mounting equip.	FFM 73-1	12-4400011-01-01
Flush Mounting Case	FMC 73-1	12-4400007-01-01

3. SecuriFire 2000 Units

Every SecuriFire 2000 basic version includes the central processor unit B6-BCB 13 and the power supply unit B6-PSU. The units B4 / B6-XXX must be equipped on the addition slot. All plugs are enclosed.

B6-LXI2 Loop I/F, LAN I/F board

B6-LXI2

20-1100002-01-01

For connecting a further two addressable loops with detectors and modules featuring SecuriLine eXtended addressable loop technology to the SecuriFire 2000. Alternatively one addressable loop and two stub lines or four stub lines can also be connected. The unit also has a LAN interface. This means that all the options of a LAN interface can be used even with 4 loops. The unit is fitted to the main control unit B6-BCB13.

Technical data

Output voltage:	30 V DC \pm 3%
Power consumption:	150 mA
Transmission type:	Start-stop operation, 8 data bits
Transmission rate:	4.800 bit/s
Direction:	bidirectional
Physical characteristics:	16-pin plug-in screw terminal RM 3,81
Ambient temperature:	-0 C to +50 C

RS 485 / 100 Base TX I/F board, 2x RS485, 1x 100Base-TX

B6-NET2-485

EG072934

For redundant networking of SecuriFire 2000 control panels or for redundant connection of PC applications. The module consists of 2 network connectors (RS 485 interface) and one 100 Base TX interfaces. The module is connected to the B6-BCB 13 main processor unit.

Technical data

Supply voltage:	internally via the system BUS
Power consumption:	53 mA
Ambient temperature:	0 °C to +50°C
Transmission type:	TCP / IP
Physical characteristics:	5 x RJ-45 sockets - 8 pole g
Direction:	bidirectional, full-duplex
LAN- interfaces:	1x Ethernet 100 Base TX
Speed:	max. 100Mbit/s
Distance:	max. 100m
RS485-interfaces:	2 x RS485 with redundant cabling, of which 1 galvanically isolated
Speed:	max. 1.25 Mbit/s
Distance:	max. 1200m
Cable:	UTP Cat 5

LAN I/F board, 1x 100Base-TX

B6-LAN
EG072940

For non-redundant networking of SecuriFire FCP 2000 control panels for non-redundant connection of PC applications. The module is connected to the B6-BCB 13 main processor unit.

Technical data

Supply voltage:	internally via the system BUS
Power consumption:	0 mA
Ambient temperature:	0 °C to +50°C
Transmission type:	TCP / IP
Physical characteristics:	1x RJ-45 sockets, 8 pole
Direction:	bidirectional, full-duplex
LAN- interfaces:	1x Ethernet 100 Base TX
Speed:	max. 100Mbit/s
Distance:	max. 100m

B4-USI Univ. Serial I/F

B4-USI
EG072834

The B4-USI is a universal communication unit and serves to connect SecuriFire 2000 to management systems and to actuate external printers, pagers, ComBOX, telephone servers, etc. The link to management systems is line type. The selection of operation mode of the interface pair parameters is performed by programming.

Technical data

Supply voltage:	intern via System BUS
Power consumption:	21 mA
Ambient temperature:	0 °C to +50°C
Range:	RS 485, RS 422 = 1200m RS 232 = 15m
Transmission type:	asynchronous serial
Baud rate:	57,6 kBaud
Interface type:	RS485, RS422 or RS232
Interfaces X2 and X4	0A/1A (RS485, RS422 or RS232)
Interface X3	PCMCIA slot (not supported)

RS 485 / 100 Base TX I/F board, 2x RS485 FXS, 2x 100Base-TX

B6-NET2-FXS

20-1100000-01-01

For redundant networking of SecuriFire 2000 control panels or for redundant connection of PC applications. The module consists of 3 network connectors (1 x RS 485 interface, 2 x FXS) and one 100 Base TX interface. The module is connected to the B6-BCB 13 main processor unit.

Technical data

Supply voltage:	internally via the system BUS
Power consumption:	179.5 mA
Ambient temperature:	-5°C to +50°C
Transmission type:	TCP/IP
Physical characteristics:	RJ-45 connector, 8-pin
Direction:	Bidirectional, full-duplex
LAN- interfaces:	Ethernet 100BASE-TX

RS 485 / 100 Base TX I/F board, 2x RS485 FXM, 2x 100Base-TX

B6-NET2-FXM

20-1100001-01-01

For redundant networking of SecuriFire 2000 control panels or for redundant connection of PC applications. The module consists of 3 network connectors (1 x RS 485 interface, 2 x FXM) and one 100 Base TX interface. The module is connected to the B6-BCB 13 main processor unit.

Technical data

Supply voltage:	internally via the system BUS
Power consumption:	205 mA
Ambient temperature:	-5°C to +50°C
Transmission type:	TCP/IP
Physical characteristics:	RJ-45 connector, 8-pin
Direction:	Bidirectional, full-duplex
LAN- interfaces:	Ethernet 100BASE-TX

B6-EIO input/output module

B6-EIO

20-1100003-01-02

The B6-EIO Unit includes 10 monitored inputs and 8 monitored outputs as well as the control electronics for the LED indication panel, which is built into the door of every SecuriFire ECP/FEP 2000.

The unit was developed for standards-compliant actuation of an extinguishing area. However, in accordance with its features, it can also be used in other ways.

Technical data

Supply voltage:	internally via the system BUS
Power consumption:	13,5 mA max. limited
Connection:	10 detection zones (up to 30 detectors / zone)
Max. line resistance	max. 50 Ω
Ambient temperature:	-5° to +50°C
Addressable:	not possible
Distance:	max. 1100 m

4. SecuriFire 3000 Boards

All modules and components of the SecuriFire system are redundant for system availability reasons, which also guarantee in the event of a fault that indication information, signal processing and the controlling of all connected fire alarm devices is ensured.

Slot Allocation

The module rack of every SecuriFire 3000 always contains

1. Main Control Board B5-MCB15 placed in slot 1
2. Power Supply Unit B5-PSU in slot 10
3. If anyone of the B5 LAN, B5-NET2-485 or B5-NET4-485 modules is used, it must be placed in slot 2
4. Slots 11 to 13 are solely for relay modules B3-REL10/16/16E. The terminal blocks for the relay boards need to be ordered separately. Using any of the slots 11 to 13 requires that slot nine is not left free. Anyone of the boards B5-BAF or B5-MRI16 must be connected to slot 9.
5. Slots 3 to 9 are for all other boards. Slot 9 needs to be equipped in order to enable slots 11 to 13.

Control board

B5-BAF

EG072908

For connecting fire brigade control panels, transmission equipment (main detectors), alarm systems (sirens) and for controlling the relay bus. The module also controls an interface for the MMI-BUS (bus for external devices) to which external operating panels, a fire brigade operating panel and other devices are connected.

Technical data

Power supply:	internally via the system BUS
Current consumption:	typically 35 mA with output controller turned on without peripheral current
Ambient temperature:	0° to +50°C
Relay bus interface:	for B3-REL10 or B3-REL16(E)
Interface FBP (DIN14661):	12 pin connectable screw clip plug
Transmission type:	parallel, bidirectional
Range:	max. 5 m
OM1 interface:	Transmission equipment or monitored output, 26 V/1.5 A
OM2 interface:	monitored output, 26 V/1.5 A
OM1 interface:	Transmission equipment or monitored max. 1200 m
MMI-BUS interface:	galvanically isolated RS 485 max. 1200 m

Loop Board, 2 Loops, SecuriLine eXtended

B5-DXI2

EG072912

For connecting two addressable loops with detectors and modules featuring SecuriLine eXtended addressable loop technology to the SecuriFire 3000. Alternatively one addressable loop and two stub lines or four stub lines can also be connected.

Technical data

Power supply:	internally via the system BUS
Current consumption:	ca. 35 mA typ.
Ambient temperature:	0° to +50°C
Elements:	2 Loop circuits, each with max. 250 devices
Logical elements:	max. 750 per B5-DXI2
Short circuit isolator:	integrated into detectors and controller modules
Individual detector identification:	integrated as standard
Cable:	1 x 2 x 0,8 mm shielded (Standard)
Loop length:	max. 3500 m
Max. line resistance:	255 Ω

RS 485 / 100 Base TX I/F board, 2x RS485, 2x 100Base-TX

B5-NET2-485

EG072910

For redundant networking SecuriFire control panels or for redundant connection of PC applications. The module consists of two network connectors (RS 485 interface) and two 100 Base TX interfaces. On the front side there are 6 RJ 45 sockets for connecting from the sub control unit network and to the Ethernet. The module can only be fitted in connection slot 2 in the module rack.

Technical data

Power supply:	internally via the system BUS
Current consumption:	120 mA
Transmission type:	TCP/IP
Physical characteristics:	6 x RJ-45 sockets - 8 pole
Direction:	bidirectional, full-duplex
LAN- interfaces:	2 x Ethernet 100 Base TX
Speed:	max. 100 Mbit/s
Distance:	max. 100 m
RS485-interfaces:	2 x RS485 with redundant cabling of which 1 galvanically isolated
Speed:	max. 2,5 Mbit/s
Distance:	max. 1200 m
Cable:	UTP Cat5

RS 485 / 100 Base TX I/F board, 4x RS485, 2x 100Base-TX

B5-NET4-485
EG072915

For redundant networking of SecuriFire control panels or for redundant connection of PC applications. The module consists of four network connectors (RS 485 interface) and two 100 Base TX interfaces. On the front side there are 10 RJ45 sockets for connecting from the sub control unit network and to the Ethernet. The module can only be fitted in connection slot 2 in the module rack.

Technical data

Power supply:	internally via the system BUS
Current consumption:	127 mA
Transmission type:	TCP/IP
Physical characteristics:	10 x RJ-45 sockets - 8 pole
Direction:	bidirectional, full-duplex
LAN- interfaces:	2 x Ethernet 100 Base TX
Speed:	max. 100 Mbit/s
Distance:	max. 100 m
RS485-interfaces:	4 x RS485 with redundant cabling of which 2 galvanically isolated
Speed:	max. 2,5 Mbit/s
Distance:	max. 1200 m
Cable:	UTP Cat5

RS 485 / 100 Base TX I/F board, 2x RS485 FXS, 2x 100Base-TX

B5-NET2-FXS
20-1000000-01-01

For redundant networking of SecuriFire 3000 control panels or for redundant connection of PC applications. The module consists of 3 network connectors (1 x RS 485 interface, 2 x FXS) and one 100 Base TX interface. The module can only be fitted in connection slot 2 in the module rack.

Technical data

Power supply:	internally via the system BUS
Current consumption:	127 mA
Transmission type:	TCP/IP
Physical characteristics:	LC 2x5 connector
Direction:	bidirectional
LAN- interfaces:	Ethernet 100 Base TX
Transmission type:	TCP/IP
Direction:	Bidirectional, full-duplex operation
Protection:	EMC and ESD with high-voltage capacitors
Mechanical design:	RJ-45 connector, 8-pin
RS485-interfaces:	4 x RS485 with redundant cabling of which 2 galvanically isolated
Speed:	max. 2,5 Mbit/s
Distance:	max. 1200 m
Cable:	UTP Cat5

RS 485 / 100 Base TX I/F board, 2x RS485 FXM, 2x 100Base-TX

B5-NET2-FXM

20-1000001-01-01

For redundant networking of SecuriFire 3000 control panels or for redundant connection of PC applications. The module consists of 3 network connectors (1 x RS 485 interface, 2 x FXM) and one 100 Base TX interface. The module can only be fitted in connection slot 2 in the module rack.

Technical data

Power supply:	internally via the system BUS
Current consumption:	127 mA
Transmission type:	TCP/IP
Physical characteristics:	LC 2x5 connector
Direction:	bidirectional
LAN- interfaces:	Ethernet 100 Base TX
Transmission type:	TCP/IP
Direction:	Bidirectional, full duplex operation
Protection:	EMC and ESD with high-voltage capacitors
Mechanical design:	RJ-45 connector, 8-pin
RS485-interfaces:	RS485. Galvanic separation
Transmission type:	Differential signal

LAN I/F board

B5-LAN

EG072903

For non-redundant networking of SecuriFire control panels and for non-redundant connection of PC applications. Two 8 pole RJ-45 sockets can be found on the front side of the module. The module can only be fitted in connection slot 2 in the module rack.

Technical data

Power supply:	internally via the system BUS
Current consumption:	0 mA
Ambient temperature:	0° to +50°C
Transmission type:	TCP/IP
Physical characteristics:	2 x RJ-45 sockets - 8 pole
Direction:	bidirectional, full-duplex
LAN- interfaces:	Ethernet 100 Base TX
Speed:	max. 100 Mbit/s
Distance:	max. 100 m

B3-USI4

For connecting SecuriFire sub control units to control systems, for controlling external printers, pagers, ComBOX units, telephone servers etc. A total of 4 redundant, serial, asynchronous interfaces can be used as redundant RS 485 connections in half-duplex mode (for loops) or as non-redundant RS 422 connections in full-duplex mode (for lines). Furthermore, two of the four interfaces can also be operated as RS 232 in full-duplex operation (line) each with 2 control circuits. The selection of each interface's operating mode is done by programming and hardware configuration. A maximum of five B3-USI4 units can be fitted per sub control unit.

Technical data

Power supply:	internally via the system BUS
Current consumption:	20 mA
Ambient temperature:	0° to +50°C
Range:	RS 485 = 1200 m RS 232 = 15 m
Transmission type:	serial, asynchronous
Baud rate:	57,6 kBaud
Interfaces:	2x2 redundant half-duplex RS 485, also full-duplex operation, galvanically isolated 2 redundant RS232 interfaces, galvanically isolated

Monitored output board

B5-OM8

20-1000002-01-01

This indicating Circuit Controller is designed for efficient, addressable control of sounders, sirens, bells and strobes. The maximum output current of 1,3 A per output and 3A per block of four lines (1 to 4 and 5 to 8) assures meeting all requirements for signaling devices. The outputs are monitored for short circuits and wire breaks.

Note: The total output current of the module depends on the capacity of the power supply unit and overall system load connected to it.

Technical data

Power supply:	internally via the system BUS
Current consumption:	28 mA
Ambient temperature:	0° to +50°C
Transmission Type:	serial
Direction:	bidirectional
Physical characteristics:	96-pin connector

Surveyed input board, incl. connector plug

B3-IM8

EG072855

The B3-IM8 is designed to provide an interface between conventional detectors and the SecuriFire panel. It enables the panel to use each of the eight channels individually to monitor the presence and operation of up to 32 conventional detectors per channel (max. 256 detectors) monitor the presence and operation of up to 10 Ex detectors in intrinsically safe applications using Z787 safety barriers monitor proper operation of an activated device such as valves, doors etc... Allows for VdS compliant monitoring of extinguishing devices. Designed and approved for Hekatron 130 Series and specific Hochiki Ex rated detectors. Please refer to the product data sheet for related information.

The inputs are supervised for open and short circuits. Each channel / input is individually programmable and configurable using configuration software and on-board jumpers.

Technical data

Power supply:	internally via the system BUS
Current consumption:	
Quiescent:	9 mA
Alarm Threshold:	10mA
Ambient temperature:	-5° to +50°C
Connection:	8 detector zones / monitored inputs

Alarm line board for detectors series 140

B3-LEE23
EG072851

For connecting up to 8 stub lines each with a maximum of 30 series 140 detectors. A maximum of five B3-LEE23 modules can be fitted to connection slots 2 to 8 of a SecuriFire module rack, however this module is only permitted for use in cases where the system is being reconditioned due to the terms of the approvals of the module.

Technical data

Power supply:	internally via the system BUS
Current consumption:	22 mA
Ambient temperature:	0° to +50°C
Detector zones:	max. 8 logical detector zones per stub line
Addressing:	the hardware address assigned to the detector can be assigned whatever logical
Wiring length:	max. 1000 m

Alarm loop board for detectors series 150

B3-LEE24
EG072852

Refurbishing module for old installations based on HX 150 detectors. Provides 4 addressable loops supporting HX protocol and 127 HX 150 detectors each. A maximum of five B3-LEE24 modules can be plugged in slots 2 to 8 of the SecuriFire module rack.

Technical data

Power supply:	internally via the system BUS
Current consumption:	27 mA
Ambient temperature:	0° to +50°C
Devices/Elements:	4 loop circuits each with max. 127 devices
Addressing:	the hardware address assigned to the detector can be assigned whatever logical software address is required
Range:	max. 1000 m

Direct current technique board (Detector series Hochiki)

B3-DCI6

EG072811

The B3-DCI6 is used for supplying and evaluating up to 6 inputs, which can be set either as detector zones using DC technology, as monitored inputs or as extinguisher inputs (e.g. VdS extinguishing interface, primary inputs, valve monitoring etc.) via jumper caps and via programming. It is possible to differentiate between a maximum of ten detector areas by means of an optional 3 core wiring system.

Technical data

Power supply:	internally via the system BUS
Line voltage:	22V to +30V
Line current:	30 mA max. current limited
Terminal resistance:	11.8 k Ω
Alarm resistance:	560 Ω
Line resistance:	Max. 71.5 Ω per core

Relay I/F board

B5-MRI16 (delivered with connectors front screw)

20-1000006-01-01

The module offers 16 bi-stable, freely programmable 24 V/3 A relay contacts. Whether a contact is Normally Open (NO) or Normally Closed (NC) is software configurable. By programming a fail-safe position the status of every individual relay can be defined in the event of a supply voltage failure or the fire alarm control panel being switched off. The B5-MRI16 can be fitted in any of the slots 2-9 of the SecuriFire module rack.

System configuration hint: The B5-MRI16 is able to drive the expansion bus (slots 11 to 13) when placed in slot 9. Doing so will allow you to run relay modules of type B3-REL10, B3-REL16 and B3-REL16E plugged in slot 11 to 13.

Technical data

Power supply:	internally via the system BUS/Relay BUS
Current consumption:	6 mA typ. (battery current)
Ambient temperature:	-5° to +50°C
Relay construction:	bistable
Contact resistance:	30 m Ω
Maximum switching surge:	30 VAC/ 30 VDC
Max. switching current:	3A both poles routed to terminals

Note: The removable terminal blocks are included..

Relay board with 230V contacts

B3-REL10 (delivered with connectors front screw)

20-1000003-01-02

The module contains 10 bi-stable, freely programmable 230 V/3 A relay contacts. Whether a contact is a make contact or a break contact is ascertained by configuration using software. By programming a fail-safe position the status of every individual relay can be defined in the event of a supply voltage failure or the fire alarm control panel being switched off. A module of type B5-BAF or B5-MR116 must be fitted to connection slot 9 of the SecuriFire module rack for controlling the relay.

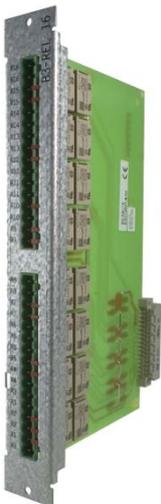

System configuration hint: The B3-REL10 can only be used in slot 11 to 13.

Technical data

Power supply:	internally via the system BUS/Relay BUS
Ambient temperature:	-5° to +50°C
Relay construction:	bistable
Contact resistance:	30 mΩ
Maximum switching surge:	230 VAC/ 125 VDC
Max. switching current:	3A both poles routed to terminals

Note: The removable terminal blocks are included.

Relay board with 24V contacts

B3-REL16 (delivered with connectors front screw)

20-1000004-01-02

The module contains 16 bi-stable, freely programmable 24 V/3 A relay contacts and is used for controlling sirens, holding magnets, relays etc. Whether the contact is a make or break contact is determined by software-based programming. By programming a fail-safe position the status of every individual relay can be defined in the event of a supply voltage failure or the fire alarm control panel being switched off. A module of type B5-BAF or B5-MR116 must be fitted to connection slot 9 of the SecuriFire module rack for controlling the relays.

System configuration hint: The B3-REL16 can only be used in slot 11 to 13.

Technical data

Power supply:	internally via the system BUS/Relay BUS
Ambient temperature:	-5° to +50°C
Relay construction:	bistable
Contact resistance:	30 mΩ
Maximum switching surge:	30 VAC/ 30 VDC
Max. switching current:	3A both poles routed to terminals

Note: The removable terminal blocks are included.

Relay board with fused 24V outputs

B3-REL16E (delivered with connectors front screw)

20-1000005-01-01

Identical to module B3-REL16 in terms of technical specifications and function, but with additional fused relay contacts (the fuses are not monitored) and resistors (3.3k Ω monitoring resistance and 680 Ω working resistance) for use as a VdS extinguishing interface. Using jumpers it is possible to choose between normal relay contacts and VdS interfaces.

System configuration hint: The B3-REL16E can only be used in slot 11 to 13.

Technical data

Power supply:	internally via the system BUS/Relay BUS
Ambient temperature:	-5° to +50°C
Relay construction:	bistable
Contact resistance:	30 m Ω
Maximum switching surge:	30 VAC/ 30 VDC
Max. switching current:	3A both poles routed to terminals
Contact protection:	Micro Fuse 3,15 A SLOW

Note: The removable terminal blocks are included.

SecuriFire 3000 Plug-in Modules

5. SecuriLine eXtended Modules

Single Detector I/F for alarm transmission

SDI 82X-1 (MCP or other contacts) **10-1200000-01-01**

Addressable I/O module typically connected to Manual Call points (MCP), Pull Stations, Smoke Switches or Door monitors. For SecuriLine eXtended.
Provides 3 inputs and 1 output, freely programmable

Technical data

Operating voltage:	12 to 30 V DC
Current draw, constant:	300 μ A
Ambient temperature:	-25 °C to +70 °C
Colour:	white
Dimensions (H x W x D):	32 x 22 x 14 mm
VdS-Approval:	G211046

Single Detector I/F

SDI 81X-1 3 Inputs 1 Output **12-1200000-01-01**

SDI 81X/1-1 3 Inputs 2 Outputs **12-1200001-01-01**

SDI 81X/1-2 3 Inputs 2 Outputs, in housing for support rail **12-1200001-02-01**

Addressable I/O module typically connected to Manual Call points (MCP), Pull Stations, Smoke Switches or Door monitors. For securiLine eXtended
With emergency alarm transmission.

Technical data

Operating voltage:	12 to 30 V DC
Current draw, constant:	300 μ A
Ambient temperature:	-25 °C to +70 °C
Colour:	white
Dimensions (H x W x D):	32 x 22 x 14 mm
VdS-Approval:	G211046

In-/Output Module

BX-OI3

20-2100001-01-03

Contains a relay output with a programmable fail-safe position, two inputs for monitored querying of potential-free contacts and an optocoupler input for monitoring external voltages. In addition, the voltage on the loop circuit is internally monitored for low voltage. The BX-OI3 is particularly well-suited for connecting special detectors (flame and line detectors, smoke aspirating systems etc.). Both the addressing of the module and the setting of parameters for connected special detectors (e.g. how they behave when there is an alarm or a fault) is carried out via the fire alarm control panel using PC software. An IP 66 protection class plastic case is used for fitting the module, which can be fitted with various different cable inlets as required. Shipped including 4 180 Ohm resistors for the monitored inputs.

Technical data

Operating voltage:	12 to 30 V
Power consumption:	typ. 550 µA
Signal transmission:	serial, 2 wire technology
Relay output:	bistable change-over contact 230 V/2A(max. 60W)
Monitored inputs:	for potential-free contacts
Optocoupler input:	Querying of potentially-bound signals, or external voltages from 0 to 30 VDC
Connection:	screw clips, maximum 1.5 mm ²
Short circuit isolator:	integrated
Protection class:	IP 66 with case
Ambient temperature:	-20° to +60°C
Rel. air humidity:	5 to 95% without condensation
Dimensions(H x W x D):	67 x 67 x 20 mm with case: 94 x 94 x 57 mm
Case:	Polystyrol, halogen-free
Colour:	grey RAL 7035
VdS-Approval:	G 210133

Note:

The box GEH MOD IP66 must be ordered separately
 → See accessories for loop modules

BX-AIM

20-2100005-01-04

Can be configured as a monitored input for querying potential-free contacts or as a collectively addressable detector zone (DC technology). The monitored input can, if required, be used as a standard extinguishing interface in accordance with VdS directives, and furthermore a balancing function of the fault thresholds for the quiescent current level is also possible (pursuant to EN 54-13 or VdS 2489). By interconnecting a Zener barrier and by using intrinsically safe detectors it is also possible to monitor hazardous areas. An IP 66 protection class plastic case is used for fitting the module, which can be fitted with various different cable inlets as required. Supplied including an alarm resistor (560 Ohm) and a terminating resistor (19k1).

Technical data

Operating voltage:	10 to 29 VDC (from the loop circuit)
Power consumption:	without DC branch: Type 460 µA with DC branch: Type. 1800 µA
Signal transmission:	serial, 2 wire technology
Function:	DC branch module, monitored input
Connection:	screw clips, maximum 1.5 mm ²
Short circuit isolator:	integrated
Protection class:	IP 66 with case
Ambient temperature:	-20° to +60°C
Rel. air humidity:	5 to 95%, without condensation
Dimensions(H x W x D):	67 x 67 x 20 mm with case: 94 x 94 x 57 mm
Case:	Polystyrol, halogen-free,
Colour:	grey RAL7035
VdS-Approval:	G208138

Monitored Output Module

BX-IOM

20-2100002-01-06

For controlling monitored devices, which are supplied with power by an external power supply (e.g. sirens etc.). The module contains a short circuit resistant monitored output (suitable for continuous operation of fur a configurable pulse emission with emission time limitation) and galvanically isolated input which can be used either as a voltage on the loop circuit is internally monitored for undervoltage. Both the addressing of the module and the setting of its parameters, which are set separately for every input, are carried out using PC software via the fire alarm control panel.

Technical data

Operating voltage:	12 to 30 V
Power consumption:	430 µA
Signal transmission:	serial, 2 wire technology
Function:	1 short circuit resistant monitored output; 1 optocoupler input
Connection:	screw clips, maximum 1.5 mm ²
Monitored output:	Loads of 20 Ω to 1kΩ, 3 load ranges
Output current:	max. 1,3 A short circuit resistant
Quiescent current:	1 to 15 mA can be set using software
Optokoppler input:	IM1+: 20-30V VEXT: 20-30V
Short circuit isolator:	integrated
Protection class:	IP 66 with case
Ambient temperature:	-20° to +60°C
Rel. air humidity:	5 to 95% without condensation
Dimensions(H x W x D):	67 x 67 x 20 mm with case: 94 x 94 x 57 mm
Case:	Polystyrol, halogen-free
Colour:	grey RAL 7035
VdS-Approval:	G210132

Note:

The box GEH MOD IP66 must be ordered separately
 → See accessories for loop modules

BX-REL4
20-2100004-01-03

Provides for four potential free relay outputs with a contact rating of 2A @ 230V. Each relay allows for COMMON, NORMALLY OPEN and NORMALLY CLOSED contacts. Each input is freely programmable using SecuriFire Studio. The module is also suitable for emitting switching impulses. The relay outputs can be switched to a fail-safe position in the event of voltage loss on the loop circuit, and the voltage on the loop circuit is also internally monitored for under voltage. It fits nicely in the IP 66 rated enclosure listed below which allows for different cable inlets.

Technical data

Operating voltage:	12 to 30 V
Power consumption:	typ. 510 µA
Signal transmission:	serial, 2 wire technology
Function:	4 potential-free relay outputs
Connection:	screw clips, maximum 1.5 mm ²
Relay output connection:	screw clips, maximum 2.5 mm ²
Length of wires:	max. 100 m
Short circuit isolator:	integrated
Protection class:	IP 66 with case
Ambient temperature:	-20° to +60°C
Rel. air humidity:	5 to 95% without condensation
Relay output:	bistable change-over contact 230 V/2 A
Switching power:	60 W (230 V, 0.25 A)
Switching frequency:	max. 3.125 Hz
Pulse emission:	200 ms- 25 s in 100 ms intervals:
Dimensions(H x W x D):	67 x 67 x 20 mm with case: 130 x 94 x 57 mm
Case:	Polystyrol, halogen-free
Colour:	grey RAL 7035
VdS-Approval:	G210134

Note:

The box GEH MOD IP66 must be ordered separately

→ See accessories for loop modules

BX-IM4

20-2100003-01-03

For indication and monitoring of various types of acknowledgements, e.g. door contacts, fire zones, extinguishing systems, sprinkler messages, etc. The module contains 4 inputs for monitored and non-monitoring querying of potential-free contacts, which are suitable for processing switching states of longer than 330ms. Both the addressing of the module and the setting of its parameters, which are set separately for every input, are carried out using PC software via the fire alarm control panel. An IP 66 protection class plastic case is used for fitting the module, which can be fitted with various different cable inlets as required.

Technical data

Operating voltage:	12 to 30 V
Power consumption:	typ. 450 µA
Signal transmission:	seriell, 2-Leiter-Technik
Function:	4 inputs for monitored or non-monitored querying of potential-free contacts
Connection:	screw clips, maximum 1.5 mm ²
Short circuit isolator:	integrated
Protection class:	IP 66 with case
Ambient temperature:	-20° to +60°C
Rel. air humidity:	5 to 95%, without condensation
Dimensions(H x W x D):	67 x 67 x 20 mm with case: 94 x 94 x 57 mm
Case:	Polystyrol, halogen-free
Colour:	grey RAL 7035
VdS-Approval:	G210131

Note:

The box GEH MOD IP66 must be ordered separately
 → See accessories for loop modules

BX-ESL

20-2100007-01-03

End position switch for deployment in sprinkler monitoring and for blocking systems. The module contains an optical light barrier which measures the movement of an activation plunger. The cables are fed into the unit using PG connection joints, with connection to the loop module being via 3 screw-type terminals. Both the addressing of the module and the setting of its parameters are carried out using PC software via the fire alarm control panel. The BX-ESL is fitted in a plastic case with IP 65 protection class and is delivered incl. 2 connection joints.

Technical data

Operating voltage:	12 to 30 V
Power consumption:	without lit LED: 400 µA with lit LED: 1300 µA
Signal transmission:	serial, 2 wire technology
Function:	1 optical light barrier
Response Time:	500 ms
Connection:	screw clips, maximum 1.5 mm ²
Short circuit isolator:	integrated
Protection class:	IP 65 with case
Ambient temperature:	-20° to +60°C
Rel. air humidity:	5 to 95%, without condensation
Dimensions(H x W x D):	58 x 58 x 34 mm with case
Case:	PA-Taromid (Thermoplastic)
Colour:	case red RAL 3016 cover black RAL 9005
VdS-Approval:	G210130

BX-O214

20-2100014-01-03

The BX-O214 has two relay outputs and four monitored inputs for polling potential-free contacts. The individual I/O functions can be configured differently and combined so that this module can be used, for example, for the integration of fire protection flaps with feedback.

Addressing and parameter assignment for the BX-O214 is performed with PC software via the fire alarm control panel.

The module includes a short-circuit isolator. In the event of wire breakage or a short-circuit, this functionality ensures that the fault is localised and at the same time maintains the full operability of the addressable loop.

Technical data

Operating voltage:	12 to 30 V
Power consumption:	typ. 550 µA
Signal transmission:	serial, 2 wire technology
Relay output:	bistable change-over contact 230 V/2A(max. 60W)
Monitored inputs:	for potential-free contacts
Optocoupler input:	Querying of potentially-bound signals, or external voltages from 0 to 30 VDC
Connection:	screw clips, maximum 1.5 mm ²
Short circuit isolator:	integrated
Protection class:	IP 66 with case
Ambient temperature:	-20° to +60°C
Rel. air humidity:	5 to 95% without condensation
Dimensions(H x W x D):	67 x 67 x 20 mm with case: 130 x 94 x 57 mm
Case:	Polystyrol, halogen-free
Colour:	grey RAL 7035
VdS-Approval:	G 211050

Note:

The box GEH MOD2 IP66 must be ordered separately

BX-O1
20-2100015-01-02

Provides one potential free relay outputs with a contact rating of 2A @ 230V. Each input is freely programmable using SecuriFire Studio.

The module is also suitable for emitting switching impulses. The relay output can be switched to a fail-safe position in the event of voltage loss on the loop circuit, and the voltage on the loop circuit is also internally monitored for under voltage. It fits nicely in the IP 66 rated enclosure listed below which allows for different cable inlets.

Technical data

Operating voltage:	12 to 30 V
Power consumption:	typ. 510 μ A
Signal transmission:	serial, 2 wire technology
Function:	1 potential-free relay output
Connection:	screw clips, maximum 1.5 mm ²
Relay output connection:	screw clips, maximum 2.5 mm ²
Length of wires:	max. 100 m
Short circuit isolator:	integrated
Protection class:	IP 66 with case
Ambient temperature:	-20° to +60°C
Rel. air humidity:	5 to 95% without condensation
Relay output:	bistable change-over contact 230 V/2 A
Switching power:	60 W (230 V, 0.25 A)
Switching frequency:	max. 3.125 Hz
Pulse emission:	200 ms- 25 s in 100 ms intervals:
Dimensions(H x W x D):	67 x 67 x 20 mm with case: 130 x 94 x 57 mm

Radio Gateway

BX-RGW

SPU 6002

BX-RGW

(loop interface incl. housing)

20-2100006-01-04

SPU 6002

(radio interface)

FG030171

Communications interface between the fire alarm control panel and the DOW 1171 and SMF 6120 radio controlled smoke detectors. Up to 30 radio controlled smoke detectors can be connected to one gateway. If the radio connection between the detector and the gateway is briefly interrupted, then a diversion via the neighboring detector will be automatically established to the next gateway. Both the addressing of the module and the setting of its parameters are carried out via the fire alarm control panel. The radio gateway is supplied via the loop. The additional 9 V battery guarantees the operation during commissioning or when the detector bus is dead. In normal operating condition the battery is switched off which leads to a service life of well over 5 years.

The radio interface board SPU 6002 plugs into the BX-RGW. Please order both assemblies for completing a radio base unit.

Technical data

Operating voltage:	12 to 30 V
Power consumption:	typ. 950 μ A
Wireless module interface:	20 pin 2 rowed multipoint connector
Buffer battery:	9V Lithium/ Manganese (lifespan>5 years)
Frequency range:	868 to 870 MHz
Transmission strength:	max. 5 mW
No. of connectible detectors:	max. 30
Range in buildings:	up to 40 metre where there is intervisibility
Aerial:	integrated, separate transmitter and receiver aerials
Protection class:	IP 54 with case
Ambient temperature:	-10° to +55°C
Rel. air humidity:	5 to 95% without condensation
Dimensions(H x W x D):	93 x 70 x 24 mm with case: 120 x 80 x 24 mm
Case:	Polystyrol, halogen-free
Colour:	grey RAL 7035

Magnetic Door holder with Door magnet support AFS 55

BX-MDH (delivered without Battery)

20-2100050-01-01

The BX-MDH is an electronically triggered magnetic door holder for connection to the SecuriLine eXtended. It has a permanent magnet which fixes the fire protection doors in the open state in normal operation without requiring electrical energy.

If there is a fire alarm or a fault, a brief current pulse neutralises the magnetic field and the fire protection doors close.

Technical data

Multiple Detector I/F

BX-MDI8

20-2100017-01-03

The has 8 monitored inputs for connecting detection zones or for polling potential-free contacts.

The module requires a redundant, external power supply for operation

Addressing and parameter assignment for the is performed with PC software via the fire alarm control panel.

The module includes a short-circuit isolator. In the event of wire breakage or a short-circuit, this functionality ensures that the fault is localized and at the same time maintains the full operability of the addressable loop.

Technical data

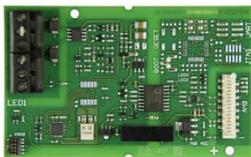

Operating voltage::	12 to 30 V-DC
Power consumption:	6 mA
Signal transmission:	Serial data transmission, 2-line technology
Connection:	Screw terminals max. 1.5 mm2
Protection type:	66 IP with map case
Ambient temperature:	-20 °C to +60 °C
Humidity ambient condition:	5 to 95 %, without condensation
Dimensions (H x W x D):	80 x 151 x 20mm with case: 94 x 180 x 57mm
Weight:	125g
VdS-Approval:	in process

Note:

The box GEH MOD3 IP66 must be ordered separately

→ See accessories for loop modules

Loop I/F for ASD 535

XLM 35

SecuriLine eXtended

11-2200003-01-01

With the installation of an XLM 35, the ASD aspirating smoke detector can be ideally connected via the addressable loop to the SecuriFire fire alarm systems. The normative alarm transmission to the superordinate FACP is then accomplished via the XLM 35. The board comes with mounting brackets, screws and ribbon cable.

Technical data

Operating voltage from AMB:	5 VDC
Maximum power consumption:	20 mA
Dimensions (H x W x D):	95 x 58 x 17mm
Weight:	56 g

6. Addressable Detectors SecuriStar

6.1. SecuriStar SecuriLine eXtended

Carbon Monoxide Multicriteria Detector

CCD 573X

30-5000006-02-02

CCD 573X MC (coloured to RAL)

30-5000006-92-02

The temperature- and CO-supported smoke sensor provides early detection of smouldering, glowing and open fires with smoke development.

- Combined smoke, heat and carbon monoxide (CO) detector according EN 54-5/7/26/29/30
- Optimal sensitivity
- False-alarm security through temperature and carbon monoxide-supported smoke alarm evaluation
- (2 different Cubus Adaptations)
- Technical CO alarm according EN 50291-1
- Adjustable technical CO pre-signal

Available in different RAL colours

Please ask for our table

"Overview_RALcolours_deenfresitnl.xls"

Technical data

Operating voltage:	7 to 31 V DC
Current consumption quiescent:	150 µA
Current consumption:	20 mA
Alarm indicator:	LED red
External indication:	5V/ 1mA
Ambient temperature:	-25 °C to +50 °C
Protection class:	IP 44
Colour:	white
Weight:	125 g
Dimensions with base Ø x H:	118.8 x 67.5 mm
VdS-Approval:	G 212183

Multiple sensor detector, smoke and heat

MCD 573X

30-5000003-02-02

MCD 573X CP (coated print, for temporarily humid areas)

30-5000003-52-03

MCD 573X MC (coloured to RAL)

30-5000003-92-02

Combined smoke and heat detector with programmable detection behaviour smoke / heat or combined.

- Dust cap included.
- self monitoring of all detector parts
- automatic smoke alarm sensitivity through CUBUS-leveling
- constant sensitivity through dust compensation
- built-in short circuit isolator
- patented "Signature Alarm" for smoke and heat
- heat detection classes A1, A2, B and indices R&S for all classes
- 100% backwards compatible to the STD531 and MCD 573

Messages

- separate alarm signalisation for smoke and heat
- 2 pre-warning levels for smoke
- warning signal for high ambient temperature
- contamination level 1 and 2

Settings via SecuriFire

- smoke and/or heat part can be temporarily disabled.
- smoke sensitivity
- programmable control output
- heat class and index

Available in different RAL colours

MCD 573X-S
30-5000003-02-01
MCD 573X-S MC (coloured to RAL)

30-5000003-52-01

Multiple sensor detector acoustic

For early detection of smouldering and open fires with and without smoke development. Single addressable

- Multiple standard use on two parallel channels (smoke/heat) according to EN 54-5, -7 and EN 54-29
- Cubus levelling for automatique adaptation to the environment conditions
- Signature alarm for smoke and heat
- Smoke pre-signal
- Alarm threshold tracing
- Selection of heat classes according to EN 54-5; Class A1, A2, B inclusive index R and S for all 3 heat classes
- Acoustic according EN 54-3, Tonality adjustable in three variable volumes

Available in different RAL colours

Please ask for our table

6.2. SecuriStar SecuriLine Standard / Not Extended

Smoke Criteria Detector

SCD 573

5000610-0111

Smoke Criteria Detector equivalent to MCD 573 but factory set to "smoke only". Intended for replacing SSD531 and MSD533 in existing installations. For new installations, the MCD573 shall used and field programmed after installation.

- addressable
- self monitoring of all detector parts
- automatic smoke sensitivity through CUBUS-levelling
- Pre-warning and alarm level
- constant sensitivity through dust compensation
- 100% backwards compatible to the SSD531 and MSD533

Technical data

Operating voltage:	16 to 30 V DC
Current consumption quiescent:	460 μ A
Current consumption:	20 mA
Alarm indicator:	LED red
External indication:	6,8 V/5 mA
Ambient temperature:	-25 °C to +60 °C
Protection class:	IP 44
Colour:	white
Weight:	125 g
Dimensions with base \varnothing x H:	118 x 67.5mm
VdS-Approval:	G208196

Temperature Criteria Detector

TCD 573-1	heat class A1	5100164-0111
TCD 573-2	heat class A2	5100164-0112
TCD 573-3	heat class B	5100164-0113

Temperature Criteria Detector equivalent to MCD 573 but factory set to "heat only" and to a specific heat class. Intended for replacing UTD531 in existing installations. For new installations, the MCD573 shall used and field *programmed* after installation.

- addressable
- false alarm resistant alarm evaluation
- fixed threshold and rate-of-rise capabilities

Technical data

Operating voltage:	16 to 30 V DC
Current consumption quiescent:	430 μ A
Current consumption:	20 mA
Alarm indicator:	LED red
External indication:	6,8 V/5 mA
Ambient temperature:	-25 ... +60 °C
Protection class:	IP 44
Colour:	white
Weight:	135g
Dimensions with base \varnothing x H:	118 x 67,5 mm
VdS-Approval:	G208197

7. Conventional Detectors SecuriStar

Smoke Criteria Detector

SCD 563

5000611-0111

SCD 563 MC (coloured to RAL)

5000611-0191

Smoke Criteria Detector

- conventional
- automatic smoke alarm sensitivity through CUBUS-levelling
- self monitoring of all detector parts
- false alarm resistant alarm evaluation
- constant sensitivity through dust compensation

Available in different RAL colours

Please ask for our table

"Overview_RALcolours_deenfresitnl.xls"

Technical data

Operating voltage:	18 to 30 V DC
Current consumption quiescent:	120 µA
Current consumption:	22.5 mA
Alarm indicator:	LED red
External indication:	6,8 V/5 mA
Ambient temperature:	-25 ... +60 °C
Protection class:	IP 44
Colour:	white
Weight:	135g
Dimensions with base Ø x H:	118.8 x 67.5 mm
VdS-Approval:	G 208198

Temperature Criteria Detector

TCD 563-1	Heat Class A1	5100165-0111
TCD 563-2	Heat Class A2	5100165-0112
TCD 563-3	Heat Class B	5100165-0113

Temperature Criteria Detector, preset to level and/or rate-of-rise according to Class A1, A2 or B.

- conventional
- highly resistant to false alarm
- fixed threshold and / or rate-of-rise capabilities
- 100% backwards compatible to the UTD521 and UTD523

Technical data

Operating voltage:	18 to 30 V DC
Current consumption quiescent:	120 µA
Current consumption:	20 mA
Alarm indicator:	LED red
External indication:	6,8 V/5 mA
Ambient temperature:	-25 ... +70 °C
Protection class:	IP 44
Colour:	white
Weight:	125g
Dimensions with base Ø x H:	118 x 67,5 mm
VdS-Approval:	G208199

8. Flame Detectors

8.1. Conventional

Flame detector triple sensor, w/o base

FDF 241-9

FDF 241-9

30-6400005-01-01

Flame detector with 3 infrared sensors and specially developed algorithms for demanding applications. Without base.

- Triple-sensor infrared flame detector
- Two sensors in various wavelengths (4...4.8µm and 5.1...6µm)
- Third sensor for increased resistance to sunlight (0.7...1.1µm)
- Microprocessor-controlled signal evaluation
- Selective evaluation of flicker frequency
- Excellent immunity to false alarms due to specially developed fuzzy algorithms and the latest wavelet diagnosis
- Selectable application algorithms
- Extremely high resistance to: electromagnetic influence, sunlight and heat radiation, humidity and corrosion
- Two different sensitivity and integration stages
- Large angle of vision (min. 90°)
- High IP protection category (IP 67)
- Large operating temperature range (-35... +70°C)

Technical data

Operating voltage:	14 to 28 VDC
Current consumption quiescent:	500 µA
Detection angle:	90°
Detection distance:	27 m with 0° viewing angle (standard) 46 m with 0° viewing angle (increased)
Protection class:	IP 67
Operating temperature:	-35° to +70°C
Rel. air humidity:	95% (without condensation)
Case:	aluminum
Colour:	white
Dimensions (W x H x D) :	135 x 135 x 77 mm
Weight with base:	750g
VdS-Approval:	G299085

Note: The base FDFB 291 must be ordered separately
 → See accessories for flame detectors

DF 1101Ex

DF 1101Ex

6400004

- Flame detector for explosion-hazard areas zone 1 & 2 with 3 infrared sensors and special algorithms for demanding applications. Two sensors for detection in various wavelengths (4...4.8µm and 5.1...6µm). Third sensor for increased resistance to sunlight (0.7...1.1µm). Without base.
- Excellent immunity to false alarms due to specially developed fuzzy algorithms and the latest wavelet diagnosis
- Selectable application algorithms
- Extremely high resistance to: electromagnetic influence, sunlight, heat radiation, humidity and corrosion
- Two different sensitivity and integration stages
- Max. 3 detectors per GTW-line allowed

Technical data

Operating voltage:	16 to 28 VDC
Current consumption quiescent:	500 µA
Detection angle:	90°
Protection class:	IP 67
Operating temperature:	-25° to +70°C
Rel. air humidity:	95% (without condensation)
Colour:	white
Dimensions (W x H x D) :	135 x 135 x 77 mm
Standard for explosion-hazard areas:	EEx ib IIC T4
Approval:	PTB 02 ATEX 2161
VdS-Approval:	G299085
CPD-Certificate:	0786-CPD-20497

Note: The base DFB 1190 must be ordered separately
 → See accessories for flame detectors

8.2. Accessories for Flame Detectors

Detector base for FDF Series

**FDFB 291****30-6800049-01-01**

Base for FDF Series
For indoor application, surface mounting
for outdoor application, a rain hood is available

Detector base for DF Series

**DFB 1190****6800078**

Base for DF 1101 Ex
For indoor application, surface mounting
for outdoor application, a rain hood is available

Rain Hood

**RH 1190****6800079**

Rain hood for the infrared flame detectors for outdoor application for FDF Series and 1101 Ex.
Dimension (W x H x D) 150 x 165 x 130 mm

Mounting bracket

**MB 1190****6800080**

This mounting bracket is used to fix the flame detector at the correct angle for FDF Series and 1101 Ex.

Ball and socket joint

**SJ 1190****6800081**

The ball and socket joint is used to line up the flame detector with the object to be monitored for FDF Series and 1101 Ex.

Test lamp for DF flame detectors (also for explosion hazard areas)

**Stabex HF****6900442**

For testing of the flame detector series DF.
Suitable also in explosion hazard areas.

9. Ventilation Duct Detector

9.1. Addressable Ventilation Duct Detectors SecuriLine eXtended

Air duct detector base set, without detector

LKM-Set

30-5500005-01-01

Housing with transparent cover. For mounting ventilation duct detectors :LKM593X, LKM140, LKM150, and LKM583 on round or rectangular ventilation ducts. Including inlet and outlet pipe.

Airflow up to maximum 20 m/s.

Technical data

Protection class:	IP 54
External dimensions (without pipes):	247 x 135 x 95 mm
Ventilation duct diameter (○):	20 to 100 cm
Ventilation duct side length (□):	15 to 100 cm
Air flow speed:	1 to 20 m/s
Weight:	485 g

9.2. Accessories for Ventilation Duct Detector

Duct Smoke detector SecuriLine eXtended

LKM 593X

30-5500001-01-01

For early detection of smouldering and open fires with smoke development. For mounting in the LKM-Set, for ventilation ducts. Individually addressable and backwards compatible to SSD 531K.

- Signature alarm for smoke
- Smoke pre-signal
- Alarm threshold trackin

Technical data

Operating voltage:	7 to 31 V DC
Current consumption quiescent:	max. 150 µA
Operating temperature:	-15° C – +60° C
Colour:	white RAL9003
Material:	PC /ABS
Weight:	125 g

10. Conventional Ex/Atex approved Detectors

Multicriteria Detector, Ex-proof, ATEX100a

MMD 130 Ex-i

30-500005-01-01

An intrinsically safe smoke detector for use in hazardous areas of zone 1 and zone 2 and certified to classification II 2 G Ex ib IIC T4. The MMD 130 Ex-i works in accordance with the scattered light principle and detects smouldering, glowing and open fires with smoke development at an early stage.

Technical data

Operating voltage:	10 to 28 V DC
Current consumption quiescent:	max. 150 μ A
Protection class:	IP 54
Operating temperature:	-20° C – +70° C
Dimensions with base \varnothing x H:	118.8 x 58.1 mm
Standard for explosion-hazard areas:	II 2 G Ex ib IIC T4
Ex Approval:	EPS 11 ATEX 1 346 X
VdS-Approval:	G 211094

10.1. Accessories for Ex/Atex approved Detectors

DC isolating converter used for "Ex-i" detectors/ 1 channel, ATEX100a

GTW 01

5700080

Barrier between safe area and hazardous area for the connection of one conventional detector line.

- Max 10 conventional detectors per line
- For DF 1101 Ex, ORM 130 Ex-i, WDM Ex-i, WMM Ex-i
- Limitation of voltage and current
- Galvanic decoupling of intrinsically safe fire detectors
- Mounted outside of the hazardous area

Technical data

Ex-zone:	IIA, IIB, IIC
Input voltage:	20 to 30 V DC
Rated current:	0 mA to 35 mA
Output voltage:	min. 15.5 VDC / max. 21.5VDC
Signal transmission:	Current increase
Protection class:	IP 54 CW
Dimensions (H x W x D):	159 x 167 x 82 mm
Flammability protection cat:	EEx ia

DC isolating converter used for "Ex-i" detectors/ 2 channel, ATEX100a

GTW 02

5700081

Same as GTW 01, except: Barrier between safe area and hazardous area for the connection of two conventional detector lines.

Ex-i end of line resistor 2k7 for modules MTI 8 / IM 8 or B4 EIO

EOL Ex 2k7

4301189

For the termination of the alarm unit's line in connection with the SecuriLine board IM8 or EIO

Ex-i end of line resistor 19k1 for module AIM

EOL Ex 19k1

4301190

For the termination of the alarm unit's line in connection with the SecuriLine eXtended module BX-AIM

Safety barrier Z 787

EXBAR Z787

FG020121

The safety barriers for intrinsically safe detector zones prevent too high an energy level from entering a hazardous area, which could cause ignition sparks if discharged there. The barrier is connected in series into the wiring of the detector zone. The device is ATEX 100a approved.

Technical data

Rated operational voltage:	max. 28 V
End-to-end resistance:	285 Ω, max. 340
Operating current:	35 mA
Total cabling length:	max. 700 m
Max. short circuit current:	93 mA
Max. external capacity:	0,07 μF / 0,5 μF (IIC/IIB)
Max. external inductance:	4 mH / 15 mH (IIC/IIB)
Ambient temperature:	-20° to +60°C
Marking:	EX II 3 G EEx n A II T4
Approval:	TÜV 99 ATEX 1484 X; BAS 01 ATEX 7005

Safety barrier Z 787F

EXBAR Z787F

FG020430

Identical to the Z787 safety barrier, but with replaceable fuse. The barrier is intended for use in exposed surroundings, where overvoltage, lightning strikes, voltage changes etc. could damage the ex barrier.

Technical data

Rated operational voltage:	max. 28 V
End-to-end resistance:	327 Ω, max. 363 Ω
Operating current:	35 mA
Total cabling length:	max. 350 m
Max. short circuit current:	93 mA
Max. external capacity:	0,07 μF / 0,5 μF (IIC/IIB)
Max. external inductance:	4 mH / 15 mH (IIC/IIB)
Marking:	EX II 3 G EEx n A II T4
Approval	TÜV 99 ATEX 1484 X; BAS 01 ATEX 7005

Spare Parts:

Description	Type	Art. No.
G-fuse 50 mA F 5x20	G SICH Z787F	FG020431

GEH EXB

FG020432

Case with a built-in 35mm fitting bracket for fitting up to 3 Z787 or Z787F safety barriers. When fitting only one safety barrier, the protective conductor terminal needed can also be fitted in the case. Shipped including three M 32 stoppers. The case contains ten M32/40 cable inlets, and the fastening bracket and two screws must be ordered separately.

Technical data

Installation type:	Surface mounting
Number of inlets:	10
Nominal diameter:	25 mm ²
Measured isolating voltage Ui:	690 V
Can be sealed with leads:	yes
Ambient temperature:	-40 to +70° C
Protection class:	IP 65 / IP 55 with M40 stoppers
Halogen-free:	no
Colour:	light grey (RAL 7035)
Material:	plastic
Dimensions (H x W x D):	200 x 160 x 98 mm

Accessories:

Description	Type	Art. No.
Mounting bracket for GEH-EXB	GEH EXBW	FG020433

11. Modernisation Detectors and Modules for SecuriFire 3000

Universal Alarm & Control Module

UAC 150

30-5700010-01-02

The UAC 150 is a Universal Alarm and Control Module of fire detection technology. It is an addressable module which can be used both as a signal receiver for devices with switching contacts (detector) and as a control module for self-powered external devices (actuator).

Technical data

Operating voltage:	18 - 30 V DC
Current consumption quiescent:	120 μ A @ 30 V
Signal transmission:	2-wire loop addressable
Dimensions (W x H x D) :	60 x 46 x 15 mm
Degree of protection:	IP 20
in connection with housing (GEH MOD)	IP 66
Adm. ambient temperature:	-20 ... +60 °C
VdS-Approval:	G211002

Spare Parts:

Description	Type	Art. No.
Housing for loop module IP66	GEH MOD	FG020234-A

Multicriteria Modernisation Detector

MMD 140

30-5000001-01-02

MMD 140 MC (coloured to RAL)

30-5000001-91-02

The MMD 140 is an automatic detector for smoke or heat, selectable via DIL-switch. It is individual addressable and operates via the fire detector line technique 140 on the Securiton fire alarm system SecuriFire, SecuriPro and BMZ.

Available in different RAL colours

Please ask for our table

"Overview_RALcolours_deenfresitnl.xls"

Technical data

Operating voltage:	14 to 30 V DC
Operating current (normal):	max. 110 μ A
Ambient temperature:	-25 ... +60 °C
Protection class (incl. USB 501):	IP 44
Colour:	white
Dimensions with base (Ø x H) :	118,8 x 67,5 mm
VdS-Approval:	G209219

Multicriteria Modernisation Detector

MMD 150

Colour: white

Dimensions (Ø x Height above surface):

USB 501-1 or 6 118 x 25 mm

USB 501-2 or 4 118 x 4.5 mm

USB 501-3 118 x 50 mm

USB 501-4

Accessories:

USB 501-5

(USB 501-1 with pipe clamp)

USB 501-6

Description	Type	Art. No.
Cover Ring "extra large" - Ø 177 mm - for USB 501-2 or 4. Used when replacing an older detector base with cover ring bigger than the USB standard	Ring 177	110470
Cover Ring (extra large) - Ø 177 mm - coloured to RAL - for USB 501-2 or 4	Ring 158 MC	3110464

Detector Base, surface mounting (w/o loop cont. switch) with illuminated ring

USB 502-20 (surface mounting, white)

20-2100019-01-01

Universal base with illuminated ring
For addressable SecuriStar detectors with uniform 6-pin terminal block. Surface mounting, without loop contact. The detector is locked into place with a bayonet catch.

Illuminated ring:

- Fixed flash rate
- Low power consumption
- Can be actuated individually

Technical data

Colour:	white
Dimensions (Ø x H):	118.5 x 25 mm
Protection class:	IP 44
VdS-Approval:	G 210152

Ex-mounting socket for surface mounting of MMD 130 EX-i

USB 501-7 Ex-i (surface mounting, white)

5000547-0007

Along with the MMD 130 Ex-i optical- and heat detectors, the is suitable for use in Ex zones 1 and 2. It has no loop contact.

Technical data

Colour:	white
Dimensions (Ø x H):	117 x 52.5 mm
Protection class:	IP 44
VdS-Approval:	G 211094

Protection basket

SRS 01 (for all SecuriStar detector series and ORM130)

5000586

Protective cage. To protect the detector from damage. Suitable for all SecuriStar detector series, as well for the HX detector series.

Technical data

Material:	Steel, nickel-plated
Dimensions (ØxH):	148 x 90mm

Protection basket, large

SRS 02 (for detectors on IP67 base or SBL 501)

5000634

Protective cage. To protect the detector from damage. Suitable for SecuriStar detectors with the socket IP67 or socket siren SBL501.

Technical data

Material:	Steel, nickel-plated
Dimensions (ØxH):	148 x 122mm

Detector mounting console

MMK200/350 (for USB501, w/o socket and detector)

FG020520

For horizontal installation of detectors on steep roofs or ceilings. Vertically adjustable in a range of 0 to 90° and expandable from 200 to 350 mm. It is ideally suited for the detector base USB 501-xx, which is mounted by means of two size M4 screws.

Technical data

Material:	Sheet steel, powder-coated
Colour:	Light gray (RAL 7035)

Detector numbering plate

DNP 521/ 531 (label max. 45x75mm or P Touch label)

3110320

Detector numbering plate for SecuriStar detectors

Optional reserve terminal block for cross-connections

USB Term
2510802

Optional terminal block for cross-connections for SecuriStar detector base USB 501-xx

Terminal Block for Detector Base, without loop cont. switch

STE 01-BK PU10
30-4100002-01-01

No loop switch for SecuriStar detector base USB 501-xx (10 pcs.)

Rubber cap for base USB 501-1

GKAPPE 501
FG020189

Transparent rubber cap to protect the base against moisture. Fits to USB501-1 or USB 501-6 only..

Fitting set USB

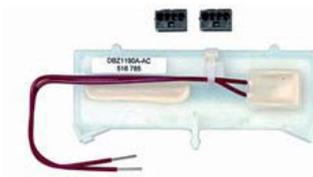

MONT SET GK

MM000250

Kit for suspended mounting of the detector base USB 501-xx by means of spacer bolts. Provides for a better adoption to the environment temperature and reduces the probability of condensation.

Detector heating for MCD 573 CP

DBZ 1190A-AC

FG020480

MM KBH KL

MM000047

Detector heating for USB501-xx. Needs cable binders and the respective holder (MM KBH KL). For detector MCD 573X CP only.

Detector dust cover for MCD, SCD or TCD

DDC 533

2870513

Detector Dust Cap for protection against dust during construction work. For SecuriStar detectors series 523/533, 563/573. (1000 pcs)

Technical data

Colour:	orange
Delivery unit:	1 piece

13. Room Indication Lamps

Room Indication Lamp

RAL 720X	(IP 42)	246336
RAL 721	(IP 65)	210056

14. Manual Call Points

14.1. Addressable Manual call points SecuriLine eXtended

Manual Call Point	IP 24 / IP 67
-------------------	---------------

MCP 545X-1 N	(surface mounting)	248800
MCP 545X-2 N	(flush mounting)	248355
MCP 545X-4 N	(IP 67)	248363
MCP 545X-1AN	(surface mounting, Ajax glass)	244252
MCP 545X-1SN	(surface mounting, with Swedish labeling)	248805

The manual call point MCP 545X N is a non automatic detector for fire alarm systems for direct connection to the SecuriLine / eXtended. An alarm is triggered directly when the glass panel is broken. The alarm persists until the glass panel is replaced with a new one.

Alarm triggering is indicated by means of a red LED.

For test purposes, an alarm can be triggered by means of a test key without breaking the glass panel.

To increase the security with respect to false alarms, the MCP 545X N can additionally be provided with a sealable hinged cover.

Technical data

Operating voltage:	7-31 V DC
Current consumption quiescent:	120 μ A
Operating temperature:	- 10 to +55°C
Protection class:	
MCP 545X-1 N, MCP 545X-1 AN and MCP 545X-2 N	IP 24
MCP 545X-4 N	IP 67
Colour:	red, RAL 3001
Dimensions (W x H x D) :	
MCP 545X-1 N, MCP 545X-1 AN	89 x 93 x 61.5 mm
MCP 545X-2 N	89 x 93 x 33.5 mm
MCP 545X-4 N	97.5 x 93 x 73 mm
VdS-Approval:	G 210094

Manual Call Point
IP 52 / IP 54

15. Special Detectors

Water sensor 12/24 VDC

WS 61 A

133981

The water detector WS 61 is sensitive to smallest amounts of water. Two sensors just above the floor activate a potential free change-over contact as soon as they get in contact with water and will thus release an alarm.

- Detects not only water but also other conductive liquids
- Completely waterproof housing
- Low current consumption
- Suitable for remote testing

Technical data

Operating voltage:	12 to 24 V DC
Operating current (normal):	10 mA
Ambient temperature:	-20 °C to +60 °C
Protection class:	IP 65
Dimensions (H x W x D) :	48 x 112 x 25 mm

Heat detector Industat

WMI 51

121657

The WMI 51 can be installed where an installation of normal fire detectors is impossible due to environmental influences such as rooms with high ambient temperatures, humid rooms, etc. The WMI51 can be connected to any input module.

Technical data

Operating voltage:	10 to 220 V DC
Operating current (normal):	0 mA
Ambient temperature:	-20 °C to +90 °C
Protection class:	IP 65
Dimensions (H x W x D) :	100 x 100 x 280 mm

16. Alarm Indication Modules

Sounder Base USB 501 on the Loop

BX-SBL 501

BX-SBL 501

BX-SBL 501-W (white) **20-2100011-02-08**

BX-SBL 501-WDB (deep base, white) **20-2100011-01-08**

Acoustic alarm unit, to be mounted between the detector socket USB501 and the ceiling or on the wall, for use in a SecuriFire fire alarm system. Connects directly to SecuriLine eXtended via 2 wire without any further power supply line. The deep base version (DB) is for a side wise cable installation.

- 3 signal tones (DIN 33404, Slow Whoop and 880Hz pulsed)
- Signal tone controlled from the FACP depending on the event
- Configurable volume high/low

Technical data

Volume:	80 dB / 90 dB(A) (low / high volume)
Operating voltage:	15 to 30 V DC
Operating current:	1.3 mA / 3.9 mA (low / high volume)
Ambient temperature:	-10 °C to +55 °C
Protection class:	IP 31d
Dimensions (D x H):	117 x 41 mm
Version DB:	117 x 45 mm
Material:	PC/ABS
Colour:	white RAL 9003

Loop ceiling siren

BX-SBL 502-W (white) **20-2100012-04-08**

BX-SBL 502-WDB (deep base, white) **20-2100012-02-08**

BX-SBL 502-RDB (deep base, red) **20-2100012-01-08**

Acoustic alarm unit, to be mounted directly on the ceiling or on the wall. Connects directly to SecuriLine eXtended via 2 wire without any further power supply line. The deep base version (DB) is for a side wise cable installation.

- 3 signal tones (DIN 33404, Slow Whoop and 880Hz pulsed)
- Signal tone controlled from the FACP depending on the event
- Configurable volume high/low

Technical data

Volume:	80 dB / 90 dB(A) (low / high volume)
Operating voltage:	15 to 30 V DC
Operating current:	1.3 mA / 3.9 mA (low / high volume)
Ambient temperature:	-10 °C to +55 °C
Protection class:	IP 31d
Dimensions (Ø x H):	114 x 32 mm
Version DB:	114 x 36 mm
Material:	PC/ABS
VdS-Approval	G 211029

16.2. Optical Alarm Medium

Beacon wall mounted

BW ESDA1000RRS	(lens red, socket red, small)	30-6300007-01-01
BW ESDA1000RRD	(lens red, socket red, deep IP65)	30-6300007-02-01
BW ESBA4000WWS	(lens clear, socket white, small)	30-6300007-03-01
BW ESBA4000WWD	(lens clear, socket white, deep IP65)	30-6300007-04-01

The beacon visually signals an alarm according EN54-23. Two flash sequences can be set. The housing is made of plastic. The Beacons can be connected to SecuriFire via B3/B5-OM8, B4/B6-EIO, and BX-IOM.

Technical data

Operating voltage:	17 to 60V DC
Power consumption typically 24 V:	
@ 0,5 Hz	20 mA
@ 1 Hz	40mA
Switch on current:	720 mA for 3,6 μ s
Flashing frequency:	0,5 or 1 Hz
Ambient temperature:	-25 °C to +70°C
Protection class:	
Flat base	IP21C
Deep base	IP65
Dimensions (\varnothing x H):	
Flat base	100 x 100 mm
Deep base	100 x 122 mm
Weight:	
Flat base	170 g
Deep base	220 g
VdS-Approval:	ESDA G214107 ESBA G214105

Beacon ceiling mounted

BC ESDA2000RRS	(lens red, socket red, small)	30-6300008-01-01
BC ESDA2000RRD	(lens red, socket red, deep IP65)	30-6300008-02-01
BC ESBA3000WWS	(lens clear, socket white, small)	30-6300008-03-01
BC ESBA3000WWD	(lens clear, socket white, deep IP65)	30-6300008-04-01

The beacon visually signals an alarm according EN54-23. Two flash sequences can be set. The housing is made of plastic. The Beacons can be connected to SecuriFire via B3/B5-OM8, B4/B6-EIO, and BX-IOM.

Technical data

Operating voltage:	17 to 60V DC
Power consumption typically 24 V:	
@ 0,5 Hz	20 mA
@ 1 Hz	40mA
Switch on current:	650 mA for 3,6 µs
Flashing frequency:	0,5 or 1 Hz
Ambient temperature:	-25 °C to +70°C
Protection class:	
Flat base	IP21C
Deep base	IP65
Dimensions (Ø x H):	
Flat base	100 x 94 mm
Deep base	100 x 117 mm
Weight:	
Flat base	170 g
Deep base	220 g
VdS-Approval:	ESDA G214107 ESBA G214105

Loop flashlight

BX-FOL-RR	(red base, red)	20-2100009-01-06
BX-FOL-WR	(white base, white)	20-2100009-02-06
BX-FOL-RO	(red base, orange)	20-2100009-03-06
BX-FOL-WO	(white base, orange)	20-2100009-04-06

Powered and driven by the loop. 2 flash frequencies (fast/slow), connectable to SecuriLine eXtended.

Technical data

Operating voltage:	12 to 30 V DC
Operating current:	6.5 mA
Ambient temperature:	-10 °C to +55 °C
Protection class:	IP 21
Dimensions (H x W x D) :	93 x 93 x 54 mm
Material:	ABS
VdS-Approval:	G 210085

Flash Light
24V

Solex R/SR/10C	(lens red, base red)	6300170
Solex A/SW/10C	(lens amber, base white)	6300171
Solex G/SW/10C	(lens green, base white)	6300172
Solex B/SW/10C	(lens blue, base white)	6300173
Solex CL/SW/10C	(lens clear, base white)	6300174

Optical xenon alarm medium in a robust design for indoor and outdoor application, available in 5 different lens colours. The red lens comes with red base only, other colours with white base only.

Technical data

Operating voltage:	9 to 60 V DC
Operating current:	80 ... 380 mA
Switch on current:	40.5mA for 4ms
Light intensity:	
red/amber, green, blue and clear	4.8/8.4/7/2.8/14 cd
Flash frequency:	1 Hz
Protection class (with special socket):	IP 54 (65)
Operation temperature:	-25 °C ... +70 °C
Dimensions (D x H):	93 x 63 mm
Housing:	ABS / Polycarbonate
VdS-Approval:	G 207018

Accessories:

Description	Type	Art. Nr.
Socket deep, red, IP 65	SO/D/R	6800145
Socket deep, white, IP 65	SO/D/W	6800146
Socket deep, red, IP 65, 230V	SO/D/R/230	6800147
Socket deep, white, IP 65, 230V	SO/D/W/230	6800148

16.3. Combined Siren /Beacon

Combined Siren/Beacon wall mounted

SBW ESFA1000RRS	(lens red, socket red, small)	30-6300009-01-01
SBW ESFA1000RRD	(lens red, socket red, deep IP65)	30-6300009-02-01
SBW ESCA4000WWS	(lens clear, socket white, small)	30-6300009-03-01
SBW ESCA4000WWD	(lens clear, socket white, deep IP65)	30-6300009-04-01

The audible/optical signal transmitter is compliant with EN 54-23 and serves to signal a fire alarm audibly and optically in buildings; with an additional IP65 base it can also be used outdoors.

The signal transmitter can be mounted on the wall (category W)

Technical data

Operating voltage:	17 to 60 V DC
Power consumption typically 24 V	
@ 0.5 Hz	25 mA
@ 1 Hz	45 mA
Switch on current:	520 mA for 3.6 μ s
Flash frequency:	0.5 or 1 Hz
Protection class Flat base (Deep base):	IP21C (IP65)
Operation temperature:	-10 °C ... +70 °C
Dimensions (D x H):	
Flat base	100x100 mm
Deep base	100x122 mm
Weight	
Flat base	220 g
Deep base	270 g
Housing:	Polycarbonate
VdS-Approval:	G 214108

Combined Siren/Beacon ceiling mounted

SBC ESFA2000RRS	(lens red, socket red, small)	30-6300010-01-01
SBC ESFA2000RRD	(lens red, socket red , deep IP65)	30-6300010-02-01
SBC ESCA3000WWS	(lens clear, socket white, small)	30-6300010-03-01
SBC ESCA3000WWD	(lens clear, socket white, deep IP65)	30-6300010-04-01

The audible/optical signal transmitter is compliant with EN 54-23 and serves to signal a fire alarm audibly and optically in buildings; with an additional IP65 base it can also be used outdoors.

The signal transmitter can be mounted on the ceiling (category C).

Technical data

Operating voltage:	17 to 60 V DC
Power consumption typically 24 V	
@ 0.5 Hz	25 mA
@ 1 Hz	45 mA
Switch on current:	510 mA for 3.6 µs
Flash frequency:	0.5 or 1 Hz
Protection class Flat base (Deep base):	IP21C (IP65)
Operation temperature:	-10 °C ... +70 °C
Dimensions (D x H):	
Flat base	100x95 mm
Deep base	100x117 mm
Weight	
Flat base	220 g
Deep base	270 g
Housing:	Polycarbonate
VdS-Approval:	G 214106

17. Radio Detectors

Wireless Detector

DOW 1171

FG030290--

Wireless smoke detector operating in the new 868-870 MHz SRD (Short Range Devices) band, released exclusively for security technology. The SRD band does not interfere with long-range industrial, scientific and medical applications with high transmission power. Up to 30 radio-linked smoke detectors can communicate with a single wireless module. Key features are:

- Highly efficient installation, easy expandable
- High operational reliability
- Outstanding interference immunity

Requires a radio base unit BX-RGW equipped with the radio interface BA-RFM to communicate with the fire alarm panel.

Technical data

Operating voltage:	2 Stk. 9V- lithium batteries
Average current consumption:	68 µA
Battery operating life:	> 5 years in normal use
Frequency range:	868 to 870 MHz (SRD band)
Channel spacing:	25 kHz
Transmission strength:	max. 5 mW
Range in buildings:	up to 40 m where there is indivisibility
Aerials:	double integrated aerials
Protection class:	IP 44
Ambient temperature:	-10° to +55°C
Rel. air humidity:	max. 95% at 34°C
Dimensions (D x H):	119 x 73 mm
Case material:	PC / ABS plastic
Colour:	white, similar to RAL 9010
Weight:	195 g
Radio approval:	CE 0123
VdS-Approval	G 211065

Accessories:

Description	Type	Art. Nr.
Detector Base for Wireless Detector	DBW 1171	FG030291--
Battery for Wireless Detector (2 pcs. per detector needed)	U9VL-J-P	FG030292--

Note:

Detector base and two 9V batteries must be ordered separately.

Note:
Labeled in German
Language only!

SMF 6120

For manually triggering a fire alarm in areas, where architectural aspects or particular operating processes mean that cables can only be laid with difficulty, or not at all. The alarm is triggered by smashing the glass panel and pressing the button. The detector communicates bi-directionally with the BX-RGW radio gateway over the 868-870 MHz. Short Range Device frequency band. Power is supplied by 2 batteries (not supplied). Requires a radio base unit BX-RGW equipped with the radio interface BA-RFM to communicate with the fire alarm panel.

Technical data

Power supply:	2 Stk. 3,6V-lithium batteries
Average current consumption:	60 µA
Battery life:	at least 5 years in normal use
Frequency range:	868 - 870 MHz (SRD)
Frequency selection:	16 groups with 5 channels
Channel spacing:	25 kHz
Transmission strength:	max. 5 mW
Range in buildings:	up to 40 m where there is intervisibility
Aerials:	double integrated aerials
Protection class:	IP 43
Ambient temperature:	-10° to +55°C
Rel. air humidity:	95%, without condensation
Dimensions:	125 x 125 x 57 mm (HxWxD)
Case material:	ABS
Colour:	red RAL 3000
Weight:	350 g
Radio approval:	CE 0123

18. Overvoltage Protection Devices

Protection module 24V for 18 wires and 2xGND, 1,5A

CT HKT-10-18FS+F/PE-TB24

6900378

Protection module + base 24V for 18 wires and 2xGND, 1,5A

Technical data

Nominal voltage:	24 V DC/AC
Total surge current (8/20) μ s:	10 kA
Protection class:	IP 20
Ambient temperature:	-25 °C ... 75 °C
Case material:	PBT
Colour:	black
Dimensions (H x W x L):	68.50 x 111 x 22 mm

Protection module + base, 230 V for Devices, 16A

PRT HKT-AD-S/A-230/FM

6900379

Protection module + base, 230 V for Devices, 16A

Technical data

Nominal voltage:	230 V AC
Protection class:	IP 40
Ambient temperature:	-25 °C ... 75 °C
Case material:	PA
Colour:	black
Dimensions (H x W x L):	33 x 31.50 x 32.70 mm

Fine protection module, 230 V for devices, 26A

PT HKT-2PE/S-230AC

6900380

Fine protection module, 230 V for devices, 26A
Overvoltage protection for device protection type 3 for end devices.

Technical data

Nominal voltage:	230 V AC
Surge voltage category:	III
Pollution degree:	2
Protection class:	IP20
Ambient temperature:	-40 °C ... 85 °C
Case material:	PA
Colour:	black
Dimensions (H x W x L):	33 x 31.50 x 32.70 mm

Protection module + base 24 V, for 4 wires and GND, 2A

PT HKT-4+F-24DC

6900381

Protection module + base 24 V, for 4 wires and GND, 2A
Protection module with protective circuit for a 4-wire, 24 V / 2 A protective circle.

Technical data

Operating voltage:	24 V AC
Protection class:	IP20
Ambient temperature:	-40 °C ... 85 °C
Dimensions (H x W):	66 x 90 mm

Protection module + base 24 V, for 4 wires and GND,300mA

PT HKT-4x1+F-24DC

6900382

Protection module + base 24 V, for 4 wires and GND,300mA
Protection module with protective circuit of 300mA.

Technical data

Operating voltage:	24 V AC
Protection class:	IP20
Ambient temperature:	-40 °C ... 85 °C
Dimensions (H x W):	66 x 90 mm

Protection module + base 5 V, for 2x2 wires and GND,450mA

PT HKT-5-HF+F-5DC

6900383

Protection module + base 5 V, for 2x2 wires and GND,450mA
Protection module with HF protective circuit for 4 signal conductors.

Technical data

Operating voltage:	5 V DC
Protection class:	IP20
Ambient temperature:	-40 °C ... 85 °C
Dimensions (H x W):	66 x 90 mm

Shield clamps for cable

SSA 3-6 (3-6 mm)

6900384

SSA 5-10 (5-10 mm)

6900385

Shield clamps for cable diameter 3-6 mm or 5-10 mm.
For connecting cable shielding to cable terminal points

Technical data

Potential connection cable:	200mm
Weight:	4.8g

FLT-CP-1S-350

6900386

Combined basic/medium protection module 230V, 160A
Lightning current and overvoltage arrester type 1+2.

Technical data

Nominal voltage UN:	240 V AC (230 V AC ... 24 V AC)
Arrester rated voltage UC (L-N):	350 V AC
Arrester rated voltage UC (N-PE):	350 V AC
Surge voltage category:	III
Pollution degree:	2
Protection class:	IP 20
Ambient temperature:	-40 °C ... 80 °C
Case material:	PBT
Colour:	gray
Dimensions (H x W x L):	70 x 71.60 x 95.80 mm

19. Batteries

Backup Battery 12V / 2.2 Ah

Battery 2.3 Ah 2er

30-2310001-01-01

Set of two batteries, Pb, 12V, VdS approved

Technical data

Dimensions (H x W x D):	69 x 36 x 180 mm
Weight :	1kg
Capacity:	2.3 Ah

Backup Battery 12V / 6.5-7 Ah

Battery 7 Ah

2310030

Battery, Pb, 12V, VdS approved

Technical data

Dimensions (H x W x D):	153 x 67 x 102 mm
Weight:	2.2kg
Capacity:	7 Ah

Backup Battery 12V / 10-12 Ah

Battery 12 Ah

2310021

Battery, Pb, 12V, VdS approved

Technical data

Dimensions (H x W x D):	153 x 92 x 102 mm
Weight:	4kg
Capacity:	12 Ah

Backup Battery 12V / 16-18 Ah

Battery 18 Ah

2310034

Battery, Pb, 12V, VdS approved

Technical data

Dimensions (H x W x D) :	183 x 78 x 169 mm
Weight:	6kg
Capacity:	18 Ah

Backup Battery 12V / 24-27 Ah

Battery 26 Ah

2310002

Battery, Pb, 12V, VdS approved

Technical data

Dimensions (H x W x D):	168 x 177 x 127 mm
Weight:	8.2kg
Capacity:	26 Ah

Backup Battery 12V / 38-45 Ah

Battery 45 Ah

2310003

Battery, Pb, 12V, VdS approved

Technical data

Dimensions (H x W x D):	199 x 167 x 172 mm
Weight:	17kg
Capacity:	45 Ah

Backup Battery 12V / 65 Ah

Battery 65 Ah

2310006

Battery, Pb, 12V, VdS approved

Technical data

Dimensions (H x W x D):	392 x 168 x 176 mm
Weight:	20kg
Capacity:	65 Ah

20. Installation, Test and Commissioning Tools

20.1. Detector Test Equipment

Univ. Detector Remover, standard ver. (for detector series 523/533/563/573)

UDR 533 S

5600095-0201

Removal and insertion of SecuriStar detector series 523/533 and 563/573.

- solid version
- Pluggable on telescopic pole series UTP

Univ. Detector Remover, cardan vers. (for detector series 523/533/563/573)

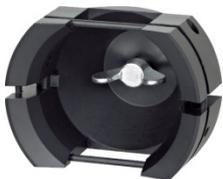

UDR 533 K

5600096-0201

Removal and insertion of SecuriStar detector series 523/533 and 563/573.

- With cardan joint
- Pluggable on telescopic pole series UTP

Adapter for UDR 521/531 K (for detector series 523/533/563/573)

UDR 533 A

5600094-0201

The UDR 533 A serves as exchangeable adaptor and can be inserted into the UDR 521/531 K, detector removers for SecuriStar detector series, 523/533, 563/573.

Univ. replacement dev. for det. series STD, SSD, UTD 5x1 with gum links

UDR 521/531

5600075

The UDR 521/ 531 serves as exchangeable adaptor and can be inserted into the UDR 521/531 K, detector removers for SecuriStar detector series STD, SSD, UTD 5x1 with gum links

Univ. replacement dev. for det. series STD, SSD, UTD 5x1 with cardan. m.

UDR 521/531 K

5600076

The UDR 521/ 531 serves as exchangeable adaptor and can be inserted into the UDR 521/531 K, detector removers for SecuriStar detector series STD, SSD, UTD 5x1 with cardanic mounting

Fire Detector Test Equipment 533

FDT 533

5600097-0201

- Fire Detector Test equipment.
For SecuriStar detector series 523/533, 563/573 (smoke and heat) and for the SecuriStar detector series 521/531 (only smoke).
- Pluggable on telescopic pole series UTP
 - For using with 918/5 test gas can

CO test extension for FDT 533

FDT 533 CO-Set

30-5600001-01-01

- For the optional enhancement of the FDT 533 for testing the CO functionality of the multiple sensor detector CCD573X.
- Pluggable on FDT 533
 - For using with CO test gas can

Adapter SOLO-Testpole to UDR 533

ASU 533

5600099-0201

Adapter Solo test pole to UDR533.

Universal Telescope pole (1.7m - 3m)

UTP 6

5600072

Pole for various detector removal and test devices.

Technical data

extendable from:	1.7 to 3.0 m
------------------	--------------

Universal Telescope pole (2.2m - 4m)

UTP 7

5600073

Pole for various detector removal and test devices.

Technical data

extendable from:	2.2 to 4.0 m
------------------	--------------

Extension (1.34m) for Univ. Telescope pole UTP 6/7

UTP 5

3330253

Extension piece 1.35 m for the telescopic pole types UTP 6 and UTP 7.

Technical data

Working height up to:	6.0 m / 7,00 m
-----------------------	----------------

Test gas

918/5 test gas can – Attention: Dangerous Good
6900124

For functional testing of smoke detectors. Lasts for approx. 200 tests. Free of halogenated hydrocarbons.

CO Test gas

SOLO C3 – Attention: Dangerous Good
6800143

For functional testing of Co detectors. Carbon monoxide is a highly toxic, colourless and odourless gas.

Smoke and Heat Det. Test Kit (incl. 2 battery batons and fast charger)

Testifire 1001
6900451-0201

Fire Detector Test equipment for SecuriStar detector series 521/531, 523/533, 563/573, smoke detectors, heat detectors and combined detectors (smoke and heat) as well for the HX detector series.

- Creates smoke and heat from the same unit
- Integrated ventilator for rapid air cleaning inside the tester
- Activation via infrared sensor, no mechanical contact necessary
- Multilanguage user menu on the display
- Battery powered, free movable device

Complete set including

- Test device smoke and heat
- two battery batons
- battery charger

Smoke, Heat and CO Det. Test Kit (incl. 2 batt. batons and fast charger)
Testifire 2001
6900452-0201

Same as Testifire 1001, except:
Including carbon monoxide release for testing of CO-detectors

Smoke Capsule

(for Testifire)

Smoke Capsule TS3
6900453-0201

For Testifire 1001 and 2001 tester.

CO Capsule

(for Testifire)

CO Capsule TC3
6900454-0201

For Testifire 2001 tester.

Battery Baton

(for Testifire)

Solo 720
6900455-0201

For Testifire 1001 and 2001 tester.

Universal Fast Battery Charger (for Testifire)

Solo 726

30-69000556-01-01

For Testifire 1001 and 2001 tester.
Universal fast battery charger

Protective Carrying / Storage Bag (for Testifire)

Solo 610

6900457-0201

Bag for tester and access poles

Pole Carrying / Storage Bag (for access poles)

Solo 620

6900458-0201

Separate Pole Carrying / Storage Bag for access poles

Fibreglass 4 Section Telescopic Pole - 4.5 metres

Solo 100

6900459-0201

Fibreglass 4 section telescopic pole
 - Extends from 1.26m to 4.5m
 - Enables access to detectors fitted up to 6m
 - Accepts three Solo 101 to reach 9m

Fibreglass 2 Section Telescopic Pole - 2.5 metres

Solo 108

6900460-0201

Fibreglass 2 section telescopic pole
 - Extends from 1.26m to 2.5m
 - Enables access to detectors fitted up to 4m
 - Accepts additional Solo 101's for greater heights

Fibreglass Extension Pole - 1,13 metres

Solo 101

6900461-0201

Fibreglass single section pole
 - Extends from 1.13m
 - Enables access to detectors fitted up to 2.5m
 - Connects to Solo 100, Solo 108 or additional Solo 101s for greater heights

20.2. Loop Test Equipment

Loop Test Board (incl. AC/DC adapter)

STB 01X-E

50-100004-02-03

Hand held control device for testing and trouble shooting of the SecuriLine eXtended installation and their participants. Includes the power supply adapter (100-240VAC/24VDC) and an USB serial interface to a PC. Suitable for SecuriLine eXtended up to 250 loop devices.

Accessories
